Tractebel Energia | GDF SUEZ - Todos os Direitos Reservados

Disclaimer

The information contained herein has been prepared by Tractebel Energia S.A. ("Tractebel Energia", "Tractebel" or "the Company") solely for meetings to be held with investors and/or potential investors. This material does not constitute offering material in whole or part, and you must obtain further information before making an investment decision in respect of the common shares of the Company.

This material has been prepared solely for informational purposes and is not to be construed as a solicitation or an offer to buy or sell any securities and should not be treated as giving investment advice. It is not targeted to the specific investment objectives, financial situation or particular needs of any recipient. No representation or warranty, either express or implied, is made as to the accuracy, completeness or reliability of the information contained herein. It should not be regarded by recipients as a substitute for the exercise of their own judgment. Any opinions expressed in this material are subject to change without notice and Tractebel Energia is not under obligation to update or keep current the information contained herein. The Company and their respective affiliates, agents, directors, partners and employees accept no liability whatsoever for any loss or damage of any kind arising out of the use of all or any part of this material.

You should consult your own legal, regulatory, tax, business, investment, financial and accounting advisers to the extent that you deem necessary, and you must make your own investment, hedging or trading decision based upon your own judgment and advice from such advisers as you deem necessary and not upon any view expressed in this material.

This material includes forward-looking statements subject to risks and uncertainties, which are based on current expectations and projections about future events and trends that may affect the Company's business. These statements include projections of economic growth and energy demand and supply, as well as information about competitive position, the regulatory environment, potential opportunities for growth and other matters. Several factors may adversely affect the estimates and assumptions on which these statements are based, many of which are beyond our control.

Highlights, Shareholding Structure, Market Share, Assets and Sales

Quarter highlights

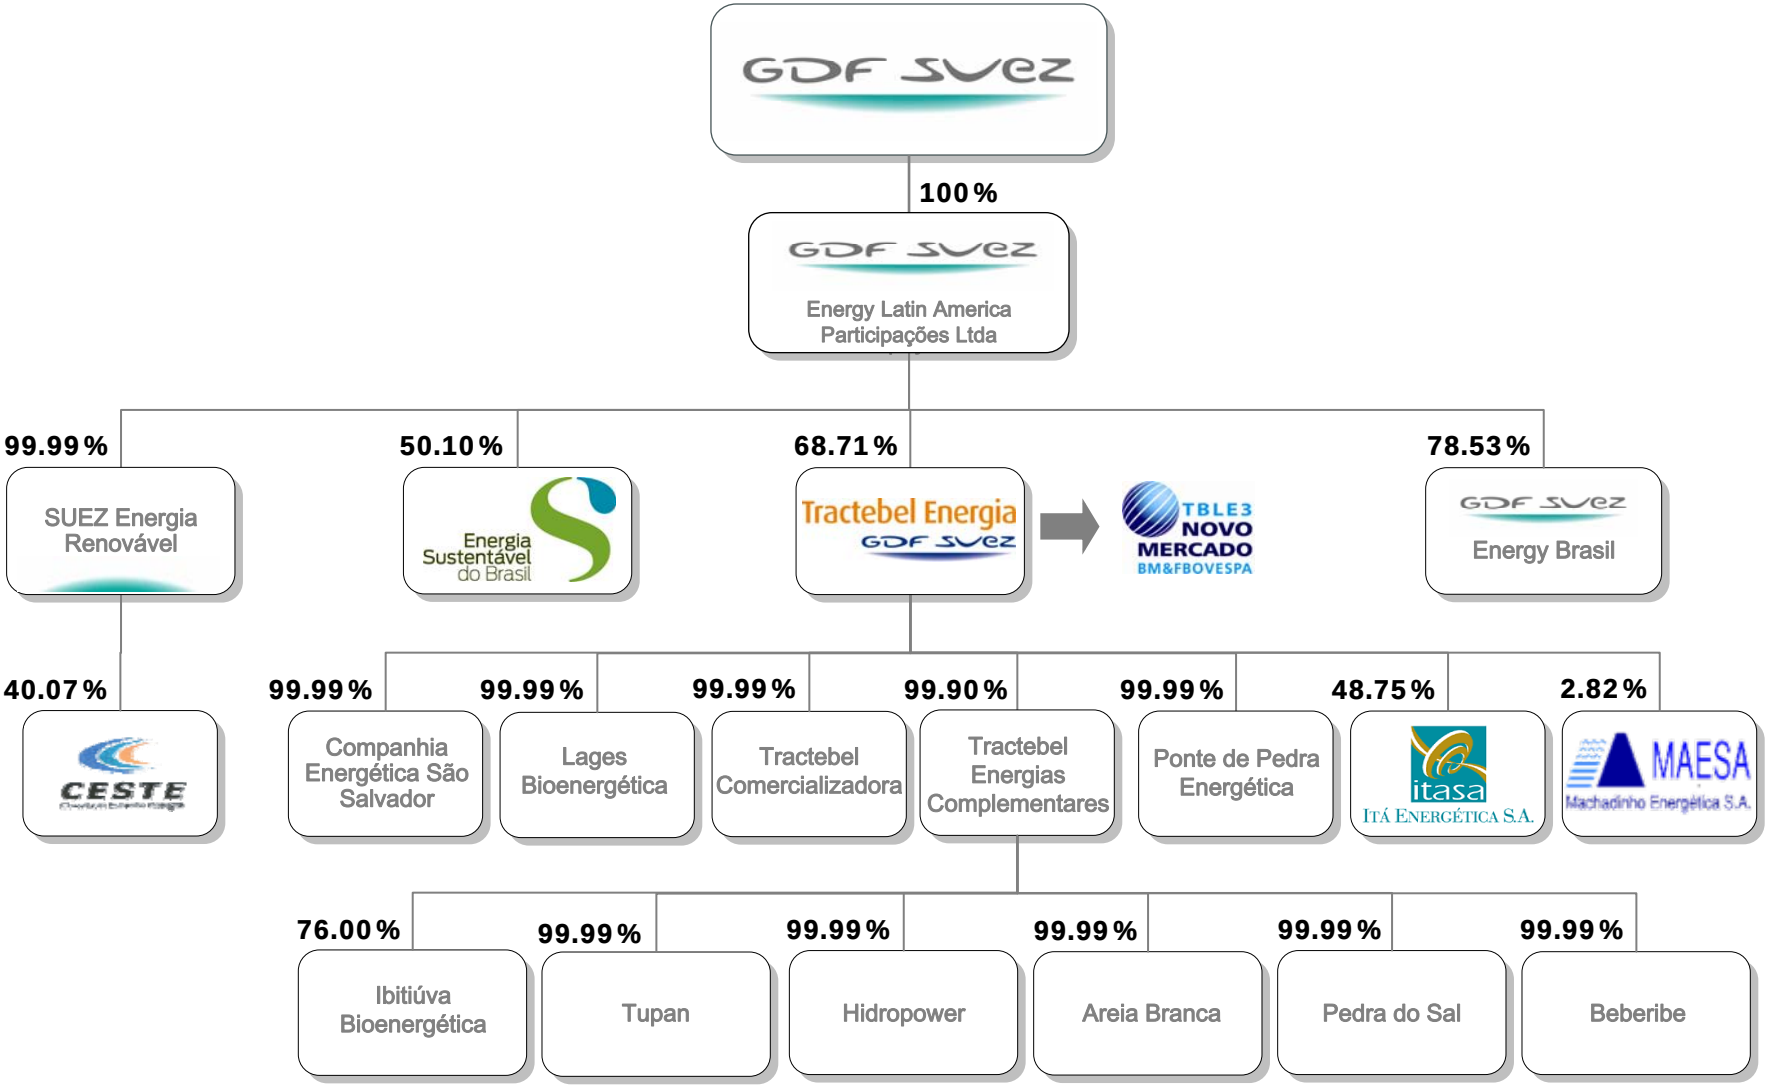

- Financial and operational indexes:

(in millions of R$)	2Q10	2Q09	Chg.
Net Operating Revenue (NOR)	964.2	835.6	15.4%
EBITDA [1]	620.6	526.9	17.8%
EBITDA / NOR - (%)	64.4	63.1	1.3 p.p.
Net Income	271.5	263.3	3.1%
Energy Sold (avg. MW)	3,934	3,473	13.3%
Average Price of Energy Contracts (R$/MWh)	108.8	109.2	-0.4%
Production (avg. MW)	4,842	1,684	187.5%

[1] EBITDA represents: operational results + financial results + depreciation and amortization.

- Broken the instantaneous generation record: 7,019 MW (capacity factor of 93.1%).
- Ibitiúva Bioenergética TPP, with 33 MW of installed capacity, started its commercial operation.
- Standard & Poor's and Fitch Ratings uplifted Tractebel's ratings to "brAA+" and "AA+(bra)", respectively.
- Approved a payout of R$ 286.1 million in interim dividends (R$ 0.438/share).
- Tractebel, along with its parent company, will hold a meeting with investors and capital market professionals to disclose initiatives in its governance to be applied to related party transactions. It will take place at InterContinental São Paulo hotel on October 1st at 9 AM.

Tractebel is controlled by GDF SUEZ, world leader in energy

Note: Simplified version

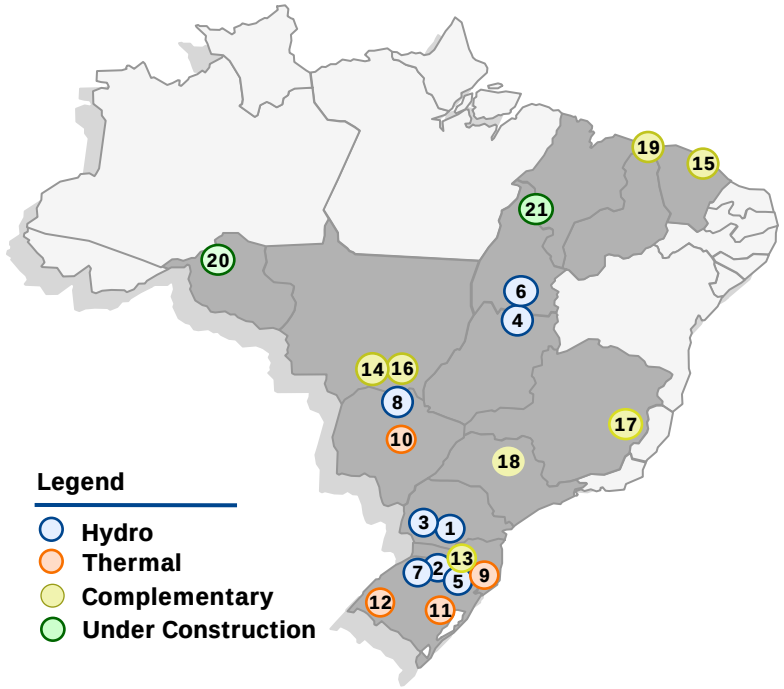

Diversified portfolio of assets, with strategic location

Installed capacity of 6,469.1 MW from 21 plants operated by Tractebel Energia: 79% hydro, 18% thermal e 3% complementary. This capacity stands for a 74% increase since 1998.

Hydro Power Plants	Installed Capacity (MW)	Commercial Capacity (aMW)[1]
1 Salto Santiago	1,420.0	723.0
2 Itá	1,126.9[2]	544.2[2]
3 Salto Osório	1,078.0	522.0
4 Cana Brava	450.0	273.5
5 Machadinho	403.9[2]	147.2[2]
6 São Salvador	243.2	148.5
7 Passo Fundo	226.0	119.0
8 Ponte de Pedra	176.1	131.6
Total	**5,124.1**	**2,609.0**

Thermal Power Plants	Installed Capacity (MW)	Commercial Capacity (aMW)[1]
9 Jorge Lacerda Complex[3]	857.0	649.9
10 William Arjona	190.0	136.1
11 Charqueadas	72.0	45.7
12 Alegrete	66.0	21.1
Total	**1,185.0**	**852.8**

Complementary Power Plants	Installed Capacity (MW)	Commercial Capacity (aMW)[1]
13 Lages (Biomass)	28.0	25.0
14 Rondonópolis (SHP)	26.6	14.0
15 Beberibe (Wind)	25.6	9.8
16 José Gelazio da Rocha (SHP)	23.7	11.9
17 Areia Branca (SHP)	19.8	10.9
18 Ibitiúva (Biomass)	18.3[2]	11.1[2]
19 Pedra do Sal (Wind)	18.0	7.8
Total	**160.0**	**90.5**

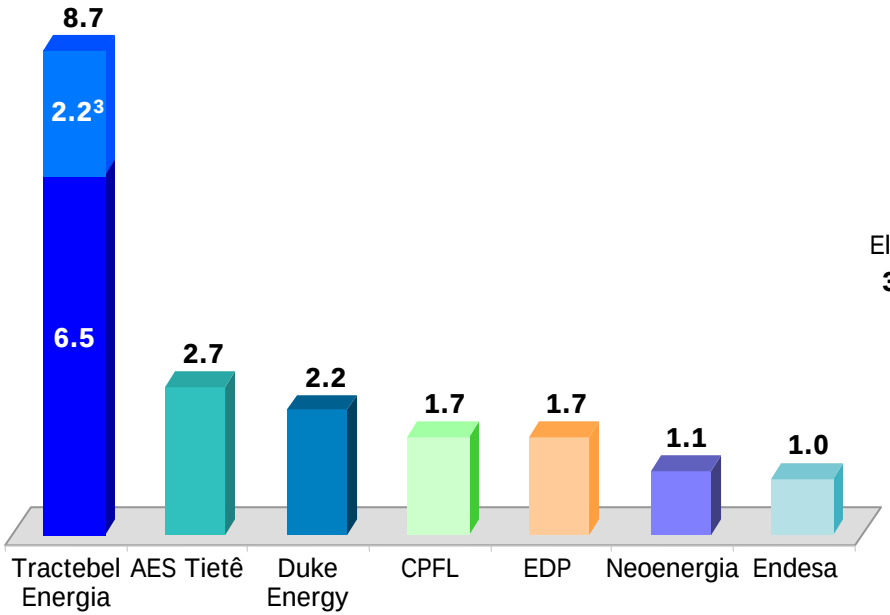

Power Plants Under Construction	Installed Capacity (MW)	Commercial Capacity (aMW)[1]
20 Jirau (Hydro)	1,728.5[4]	1,024.9[4]
21 Estreito (Hydro)	435.6[2]	256.9[2]
Total	**2,164.1**	**1,281.8**

[2] Portion owned by Tractebel Energia.
[3] Complex comprised of 3 power plants.
[4] Portion owned by GDF SUEZ

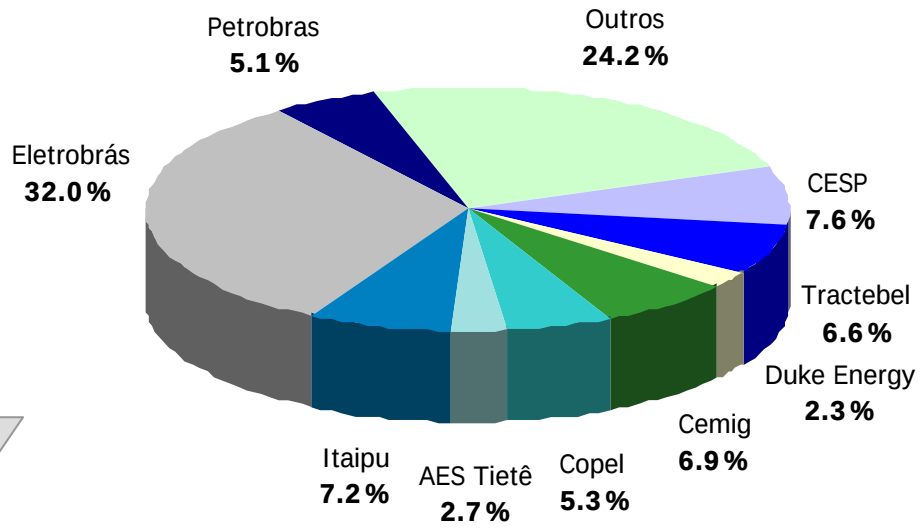

Leading position in the generation sector

Tractebel Energia is the largest private player in the Brazilian generating market...

Private Sector – Installed Capacity (GW)

Brazil – Installed Capacity[1,2]

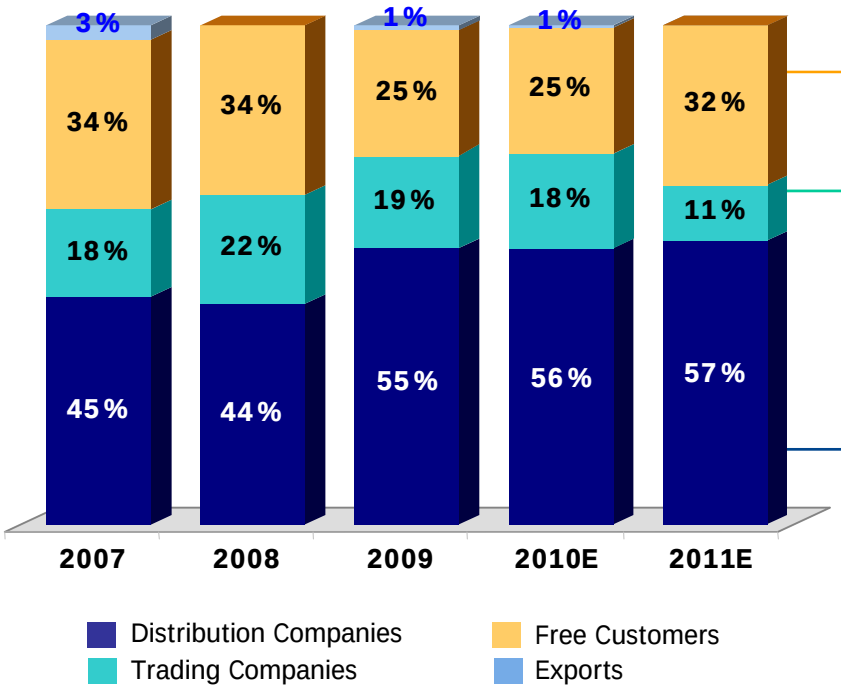

Source: Aneel and Companies' websites.

Notes:
[1] Amount corresponding to SIN – National Interlinked System.
[2] Includes only the Brazilian part of Itaipu.
[3] Installed capacity under construction.

...and is well positioned to play a consolidating role.

Diversified portfolio among free customers, distribution and trading companies

Client Breakdown (based on contracted energy)

First to consistently serve the free market...

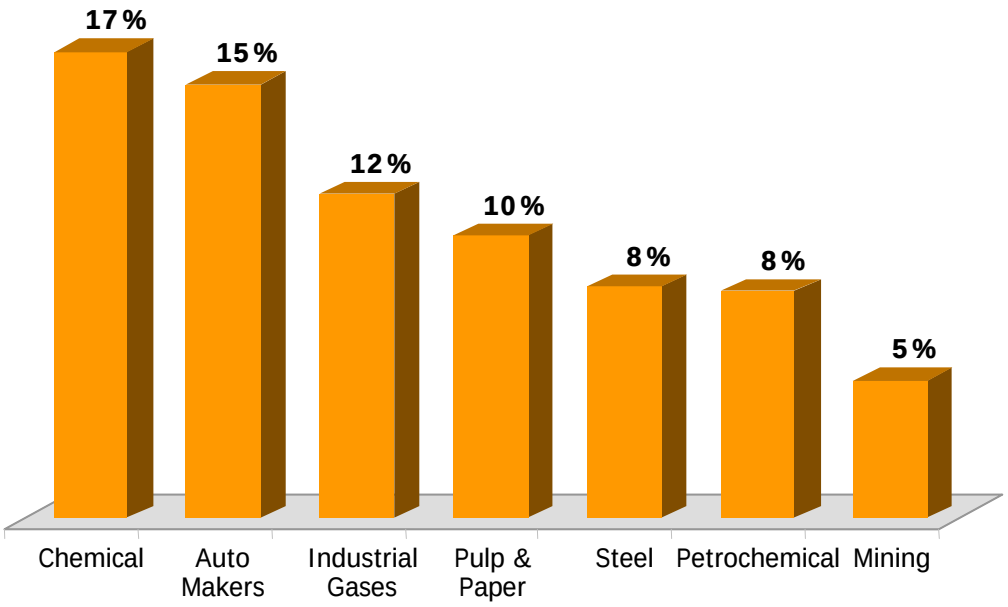

- Flexibility (prices, terms and conditions) → Maximizes portfolio's efficiency
- Solid client relationship → Liaison with some free customers
- Largest consumer market
- Regulated and unregulated contracts → Long-term cash flow predictability

...to maximize portfolio's efficiency.

Diversification also inside of free customers portfolio

Free customer industry diversification and a strict credit assessment policy allow for a zero default reality.

Free customers total sales volume for 2010:
981 average MW

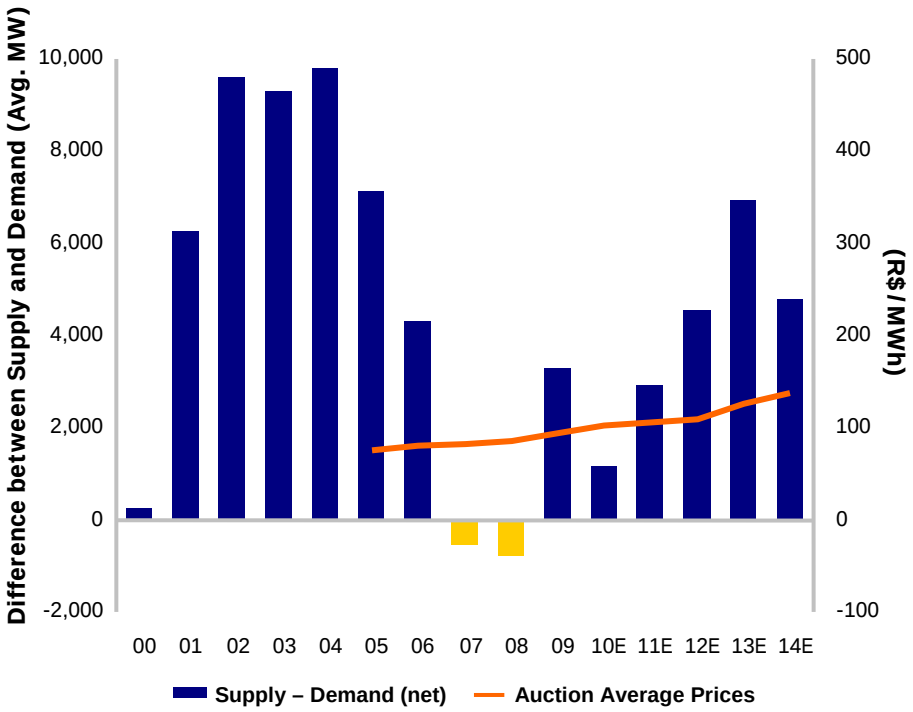

Energy Market in Brazil

New expensive thermal plants should sustain prices

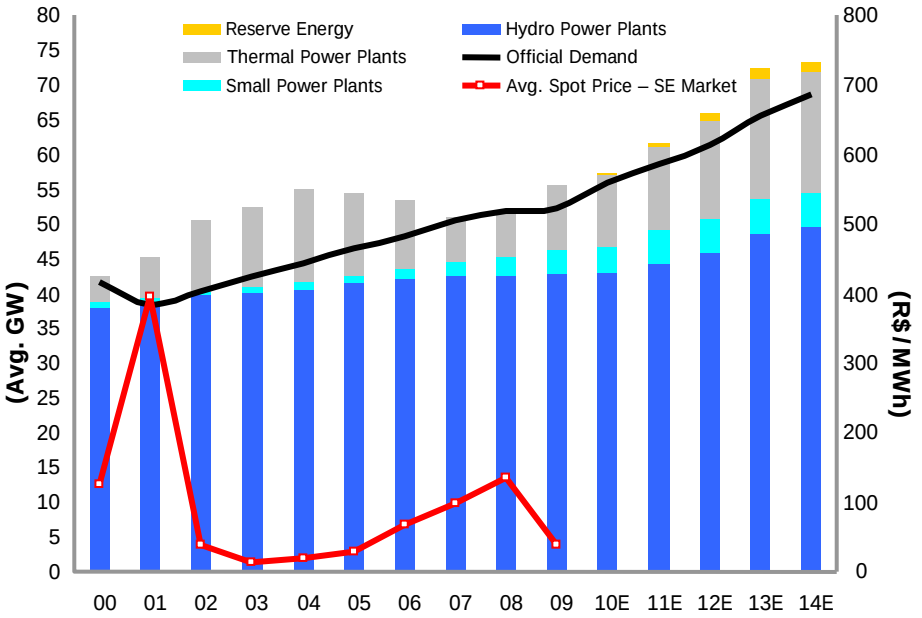

The recent auctions for thermal power plants will increase the energy supply over demand for the next years and also the prices in the Regulated Contracting Environment (ACR).

Energy Market Outlook

Supply Distribution by Source

Source: Internal study based on information provided by Aneel and ONS.

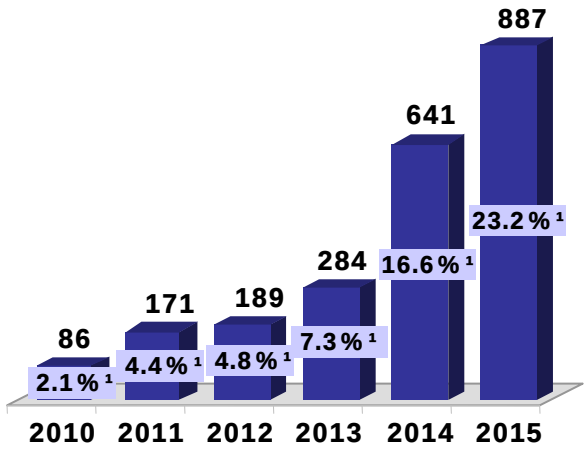

Sales Strategy

The energy for delivery in the medium term is almost fully contracted

Tractebel's commercial strategy considers, among others aspects, the gradual sale of future availability. As the time goes by, the Company is able to better foresee the market conditions in a given year ahead and, as a result, to fine tune the amount of uncontracted energy.

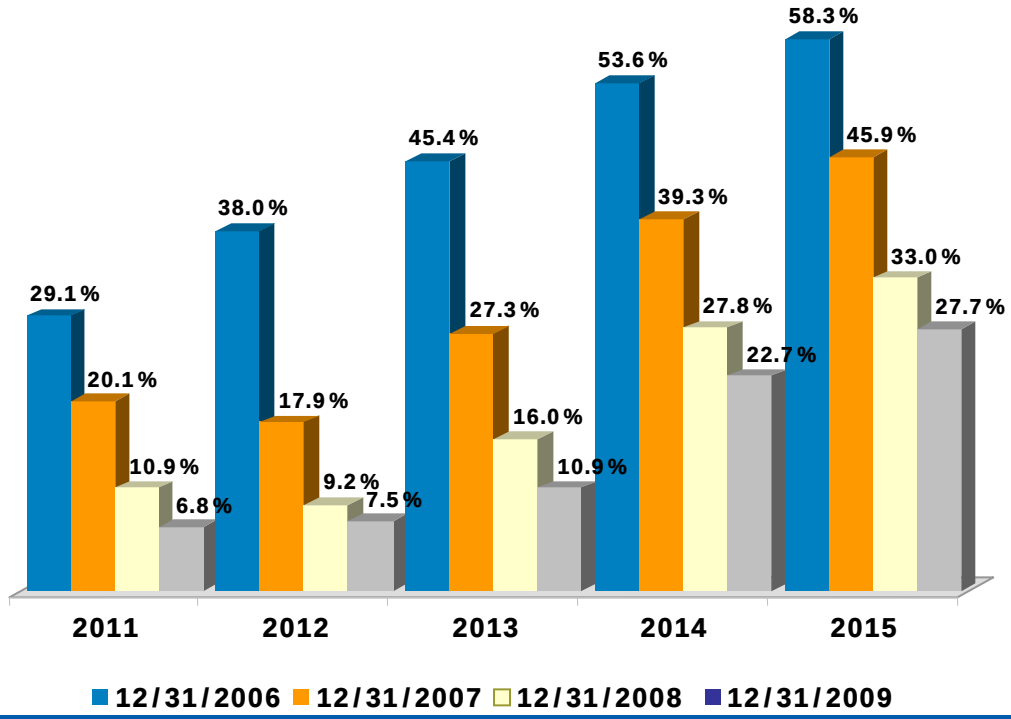

Tractebel Energia's Uncontracted Energy

(average MW)

Note:
¹ Percentage of total resources.

Tractebel: Uncontracted Energy Compared to the Availability of a Given Year

* XXXX-YY-WWW-ZZ, where:
XXXX ⇨ year of auction
YY ⇨ EE = existing energy or NE = new energy
WWWW ⇨ year of delivery start
ZZ ⇨ supply contract duration (in years)

*1: Sales price is net of ICMS and taxes over revenues (PIS/Cofins, R&D), as of 06/30/10.

*2: Purchase net price, considering benefits from PIS/Cofins credits, as of 06/30/10.

Note: The balance refers to the settlement point. It considers the energy generated by the Estreito, which start of operations is scheduled for 1Q11.

Growth

Hydro project under construction: Estreito

On Dec. 21, 2009, Tractebel's Board of Directors approved the acquisition of GDF SUEZ's share in Estreito Hydro Power Plant, i.e., 435 MW. The approval of the deal by Aneel was granted in late July, this allowing for the transfer of shares and convening of EGM already in 3Q10.

Project Description

Estreito Hydro Plant	
Installed Capacity:	1,087.0 MW
Assured Energy:	641.0 MW
Ownership:	40.1%
Total investment (R$mm):	2,090
Start of construction:	2007
Start of operations:	2011

The commercial capacity associated to that share, 256 aMW, was sold at the new energy auction held in October 2007, for a 30-year period, as from 2012, at R$ 145.75/MWh as of June 30, 2010.

Hydro project under construction: Jirau

Energia Sustentável do Brasil, from which GDF SUEZ holds 50.1%, is responsible for the construction, maintenance, operation and sale of the energy from Jirau Power Plant. 70% of the power to be generated by Jirau was sold at the new energy auction held in May 2008, for a 30-year period, as from 2013.

Project Description

Jirau Hydro Plant	
Installed Capacity:	3,450.0 MW
Assured Energy:	2,045.7 MW
Ownership:	50.1%
Start of construction:	2009
Start of operations:	2012

Financial Performance

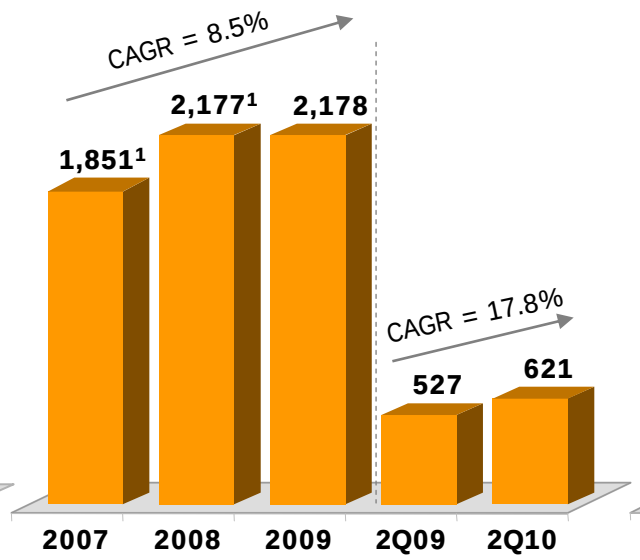

Consistent and constant growth of the financial performance

Efficient management of its client portfolio and focus on contracting strategies have paved the way for a substantial top line growth of both revenues and EBITDA over the years. Consistent net income has supported the Company's investment plan.

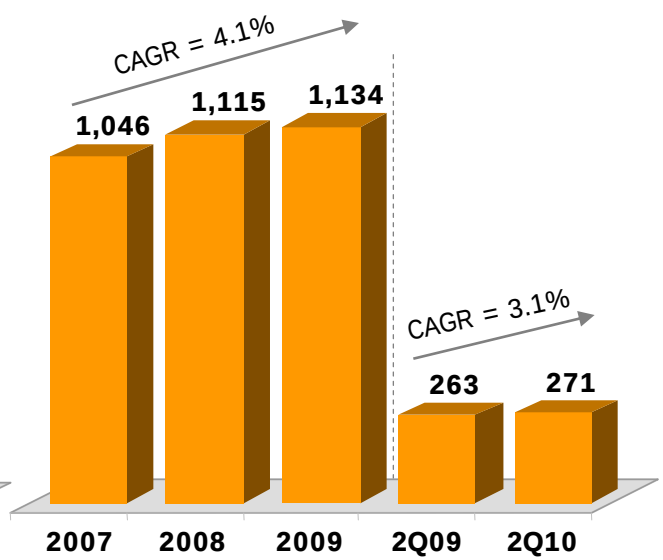

Net Revenues (R$ million)

EBITDA (R$ million)

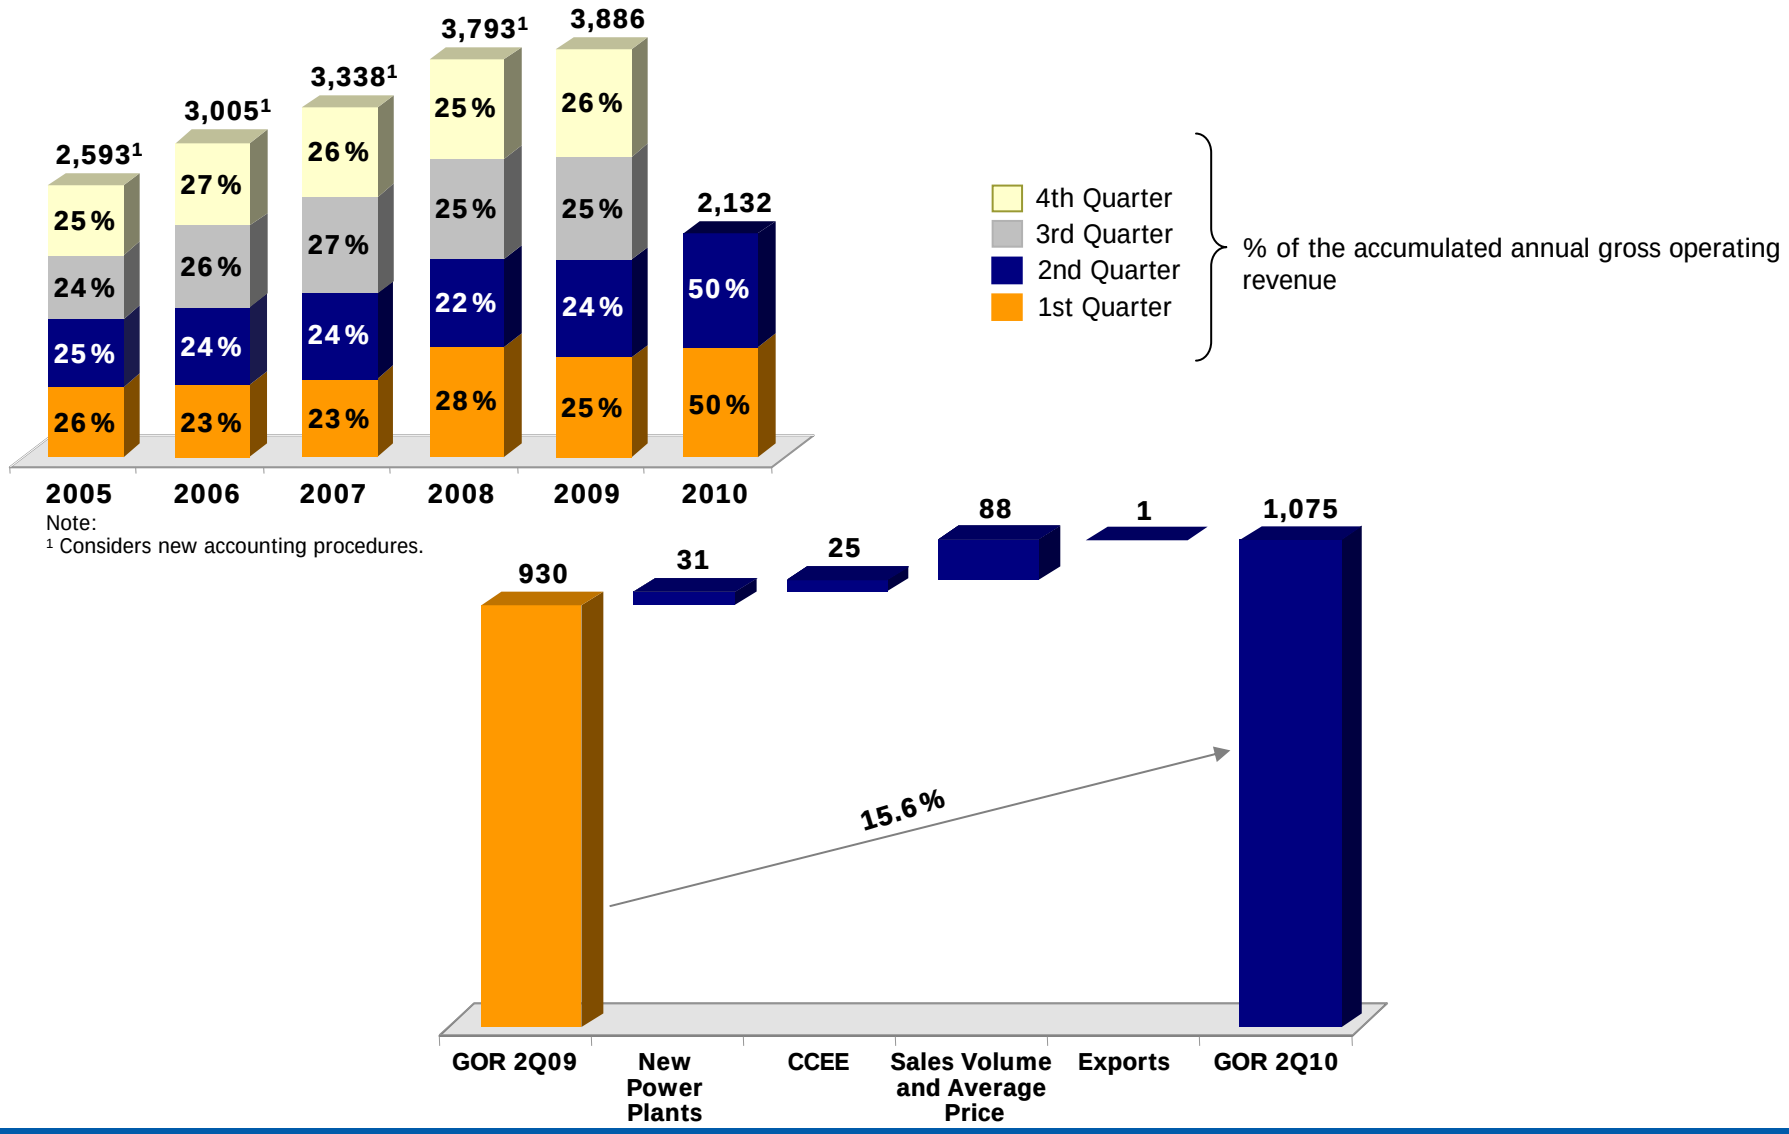

Net Income (R$ million)

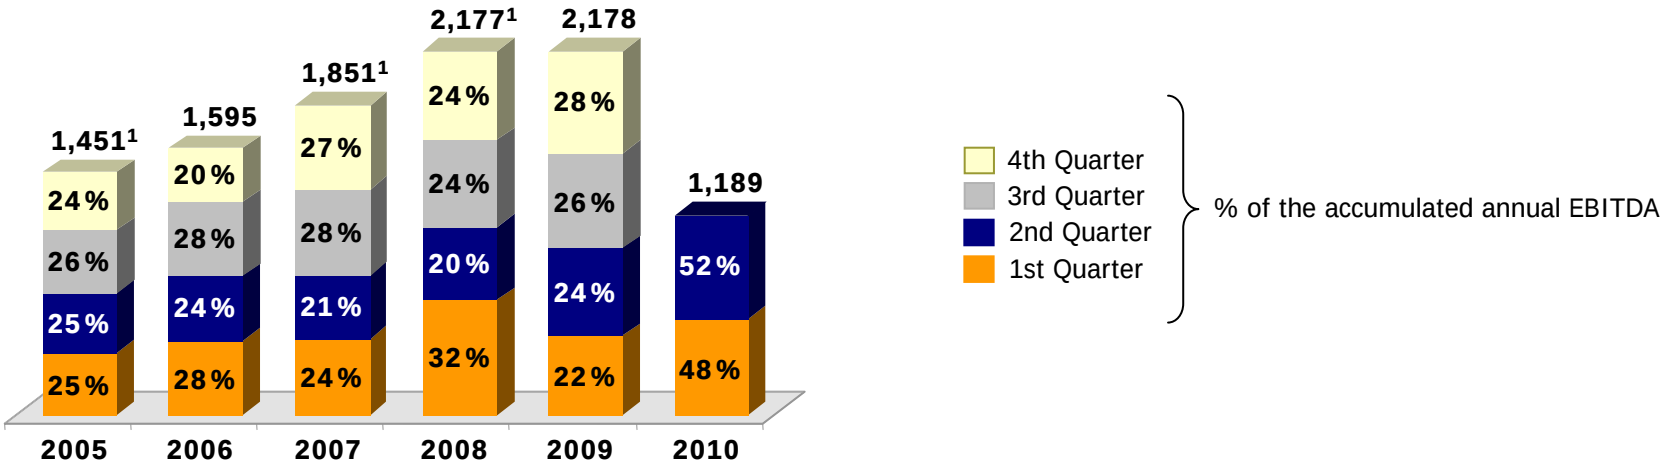

Note:
[1] Considers new accounting procedures.

Results for 2Q10 were mainly impacted on a year-on-year basis by: (i) favorable combination of prices and volumes; (ii) increase in volume of electric power purchased for resale; (iii) CCEE result growth; (iv) inflation boost; and (v) non-recurring events.

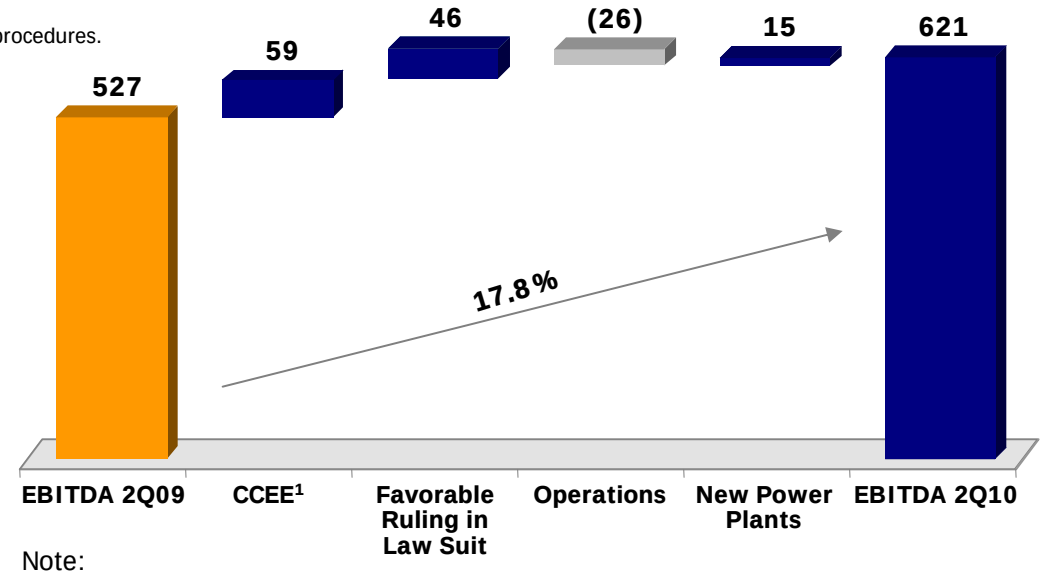

Gross operating revenues change (R$ million)

EBITDA change (R$ million)

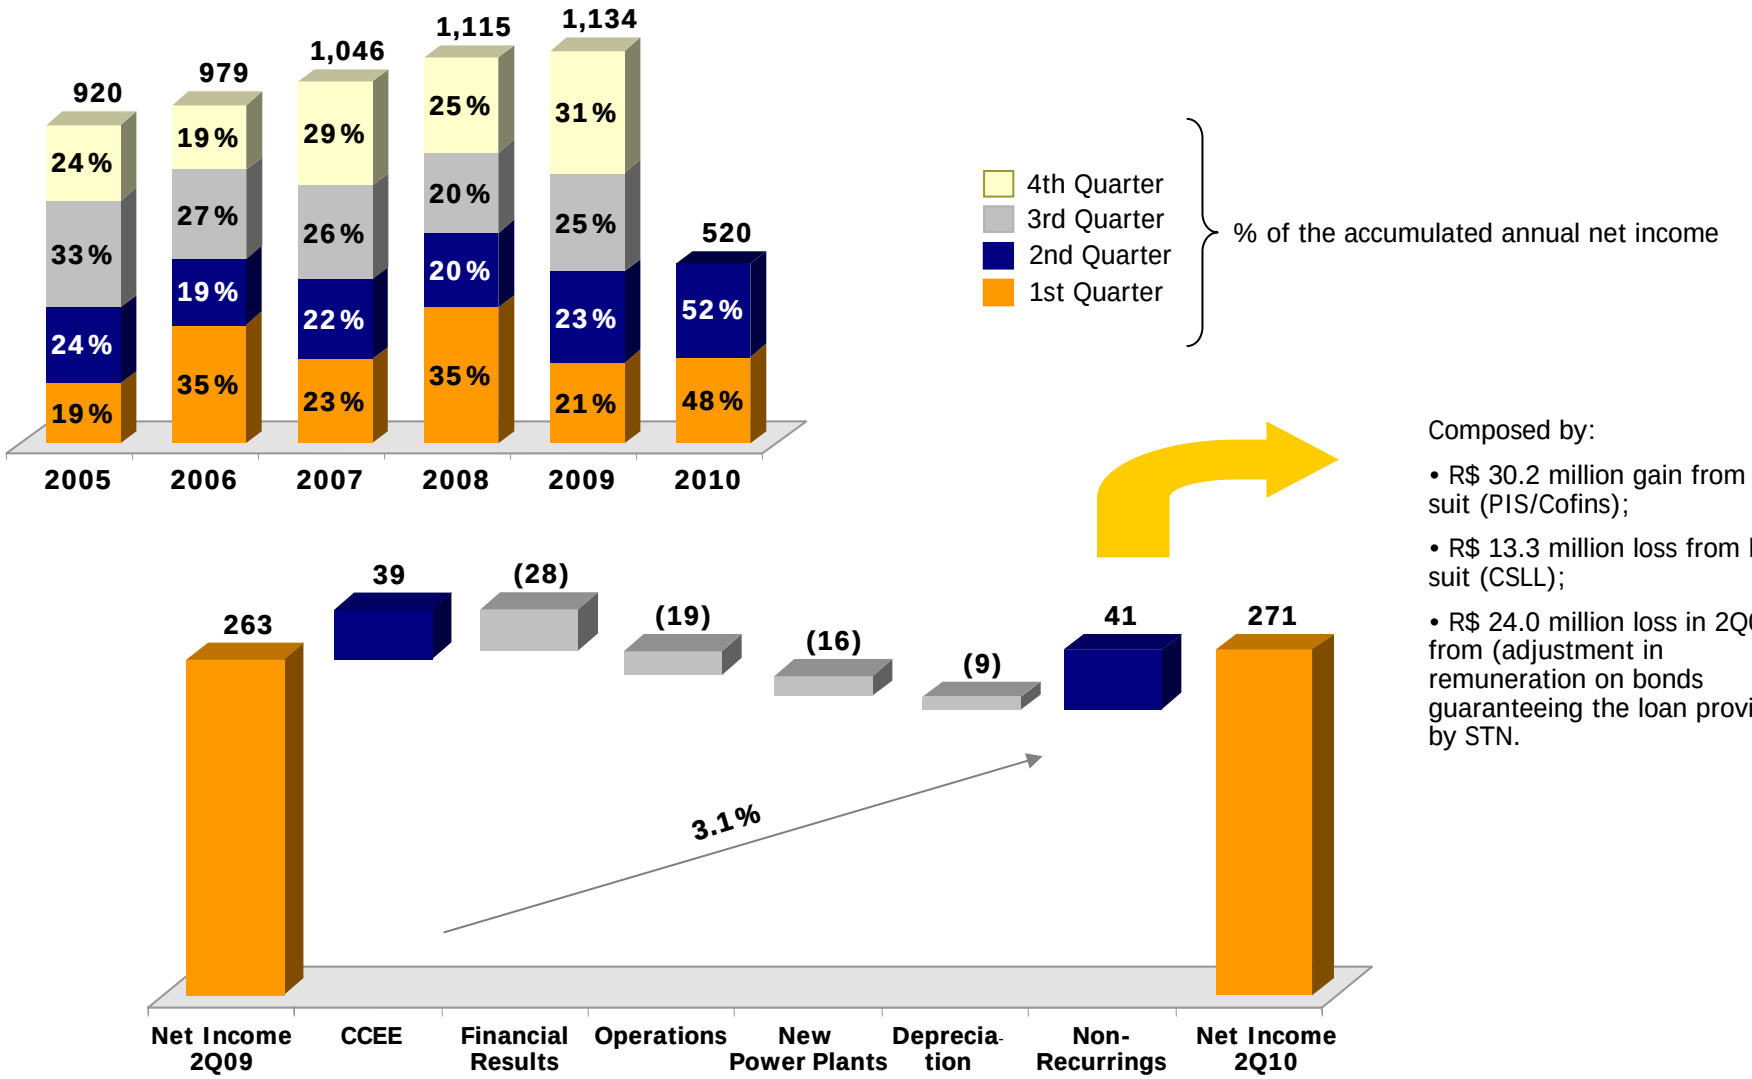

Note:
[1] Considers new accounting procedures.

Note:
[1] Considers the combined effect of changes in revenue and expenses.

Net income change (R$ million)

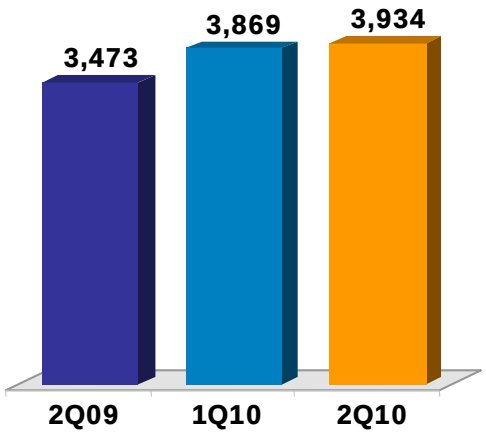

Composed by:

- R$ 30.2 million gain from law suit (PIS/Cofins);
- R$ 13.3 million loss from law suit (CSLL);
- R$ 24.0 million loss in 2Q09 from (adjustment in remuneration on bonds guaranteeing the loan provided by STN.

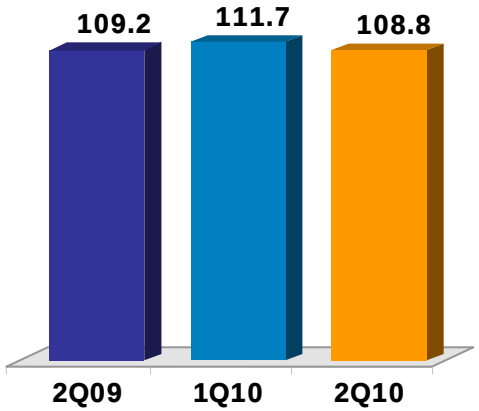

Quarterly financial drivers

Quarterly performance could be affected by allocation strategy of assured energy.

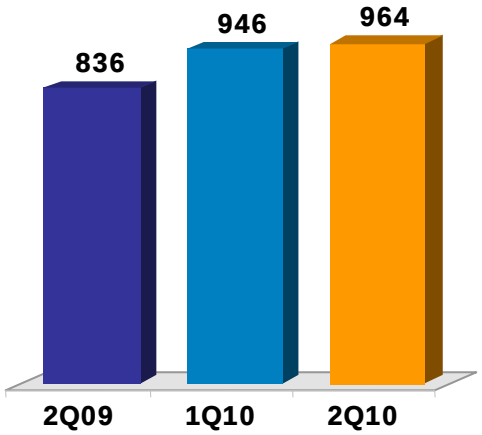

Energy Sold (avg. MW)

Average Price of Energy Sold (R$ / MWh)

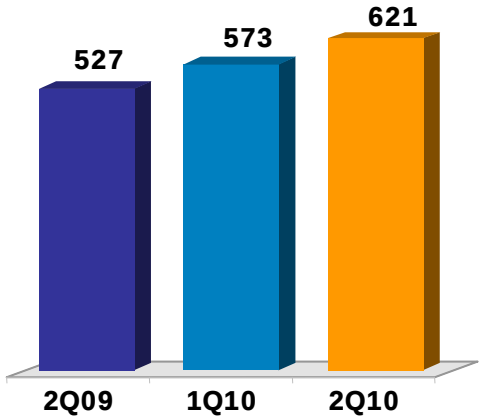

Net Revenues (R$ million)

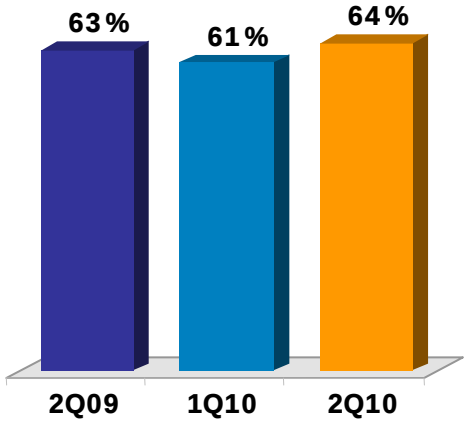

Note: Figures are net of deductions.

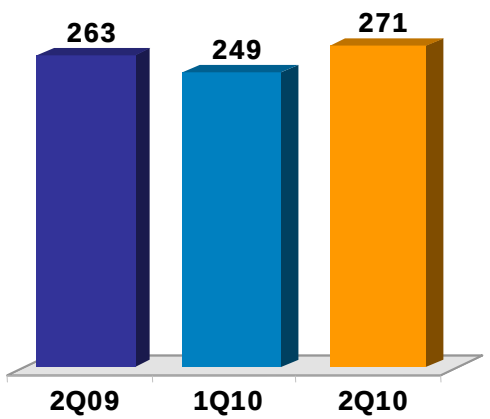

EBITDA (R$ million)

EBITDA Margin

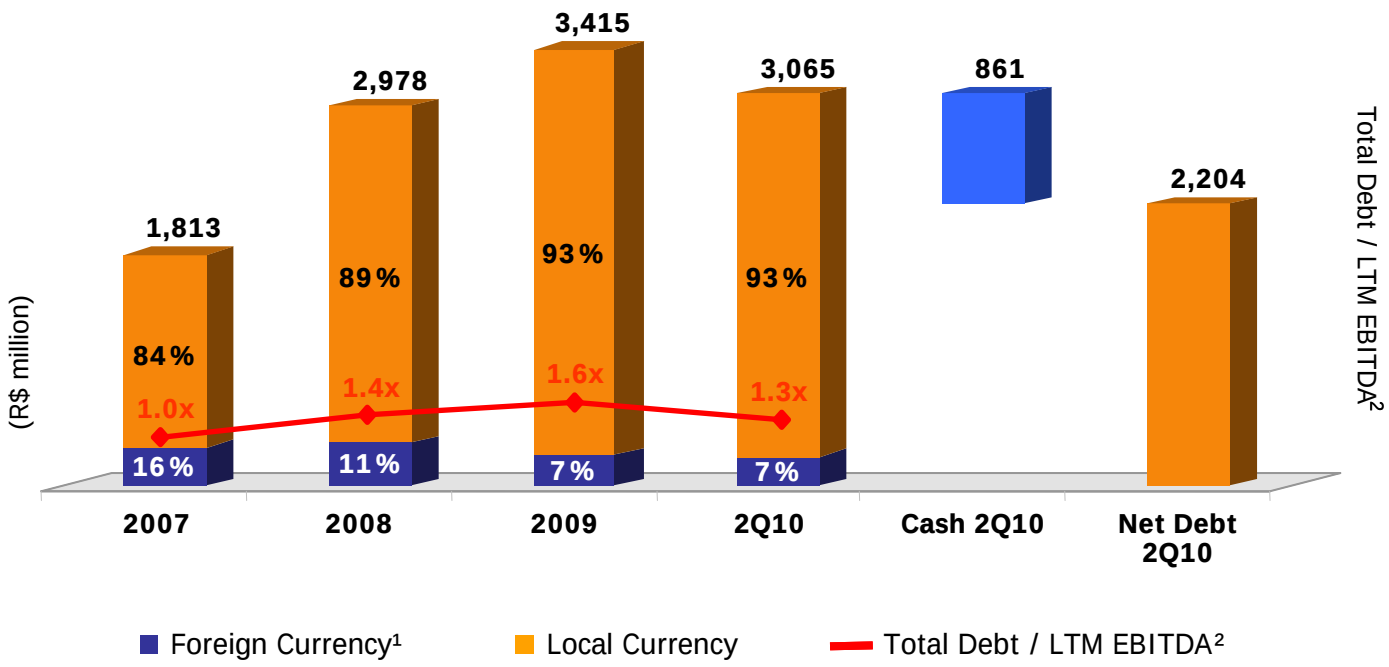

Net Income (R$ million)

Limited indebtedness and low exposure to foreign exchange

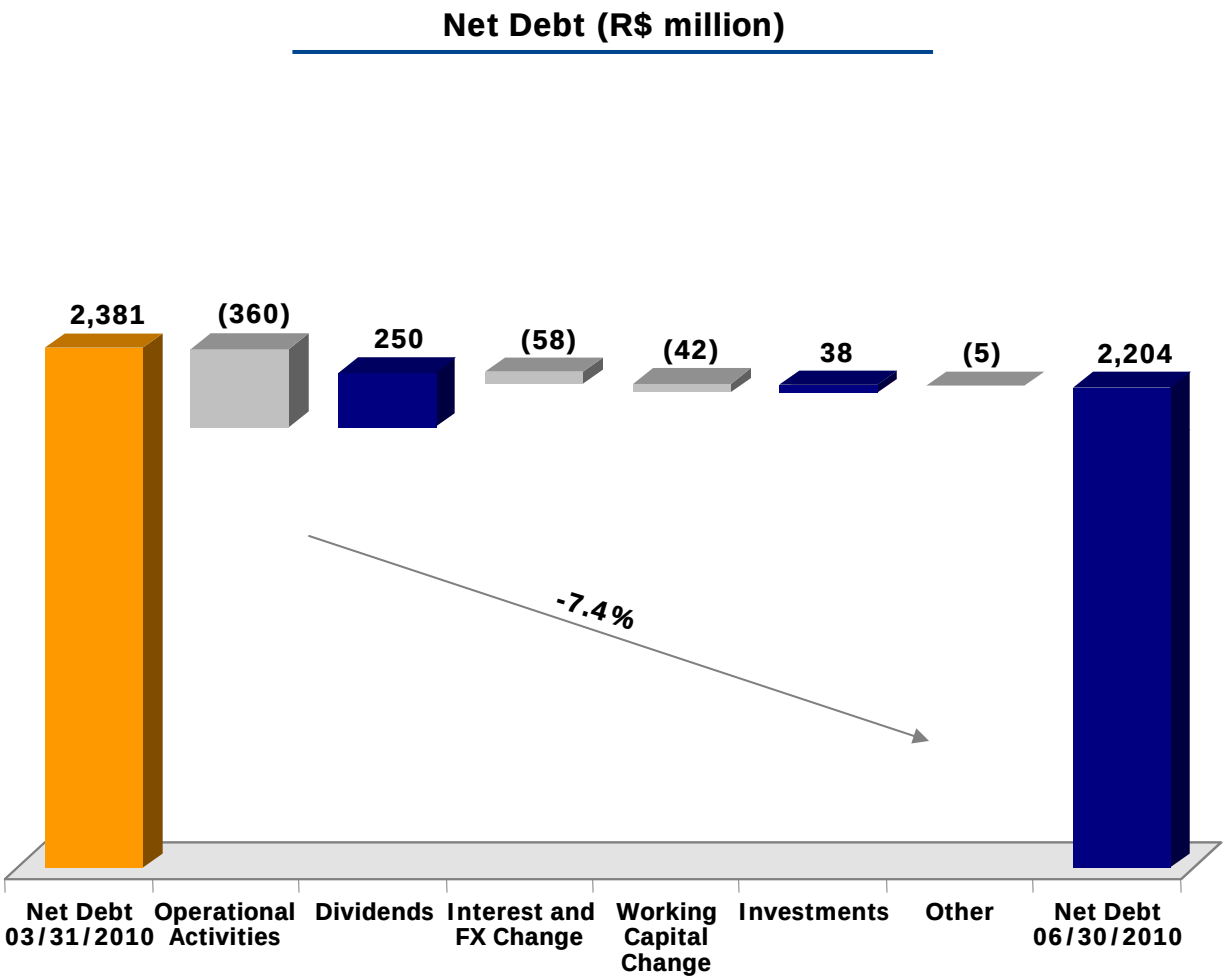

Low leverage enables Tractebel to benefit from growth opportunities.

Debt Overview (R$ million)

Note:
¹ Not hedged.
² LTM EBITDA = last-twelve-month EBITDA.

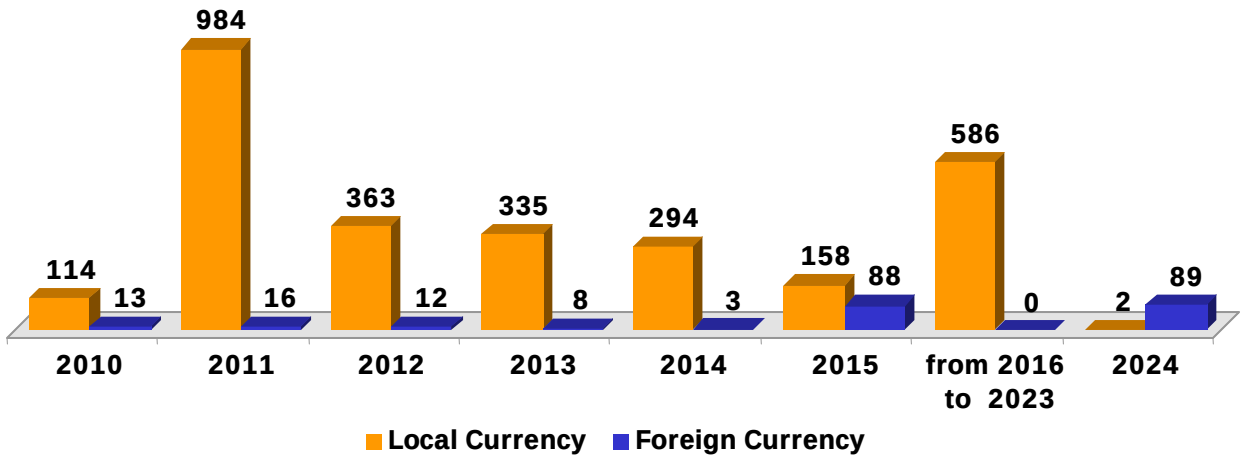

Net debt change

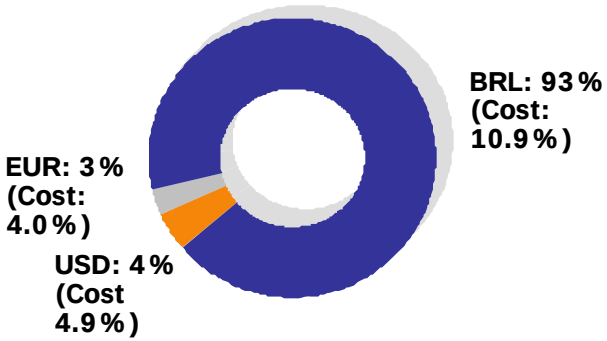

Medium and long-term debt, with low costs and defensive indexes

Debt profile and strong cash generation reduce refinancing risk.

Maturity Term Loans – R$ million

Cost of Debt

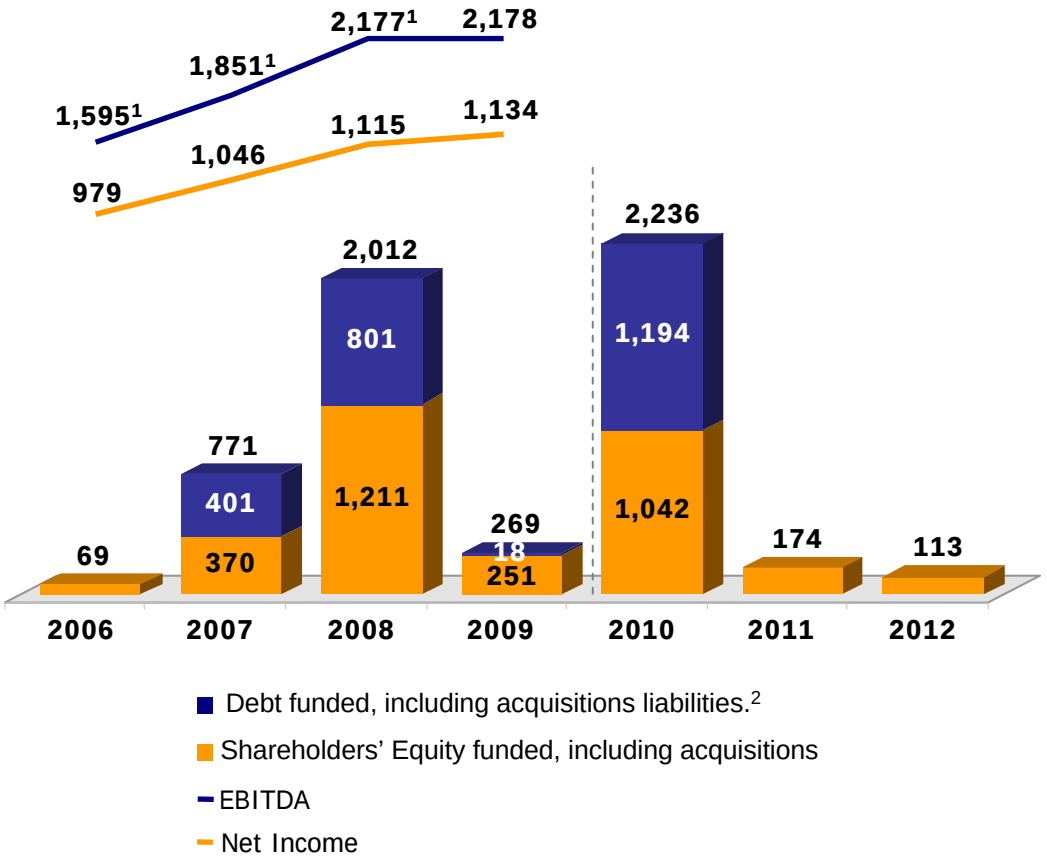

Composition of Debt	
Foreign Currency	
Fixed	53%
Floating	47%
Total	**100%**

Local Currency	
Fixed	3%
TJLP	40%
IGPM	6%
CDI	36%
IPCA	15%
Total	**100%**

Low recurring and expansion CAPEX are supported by a high cash flow

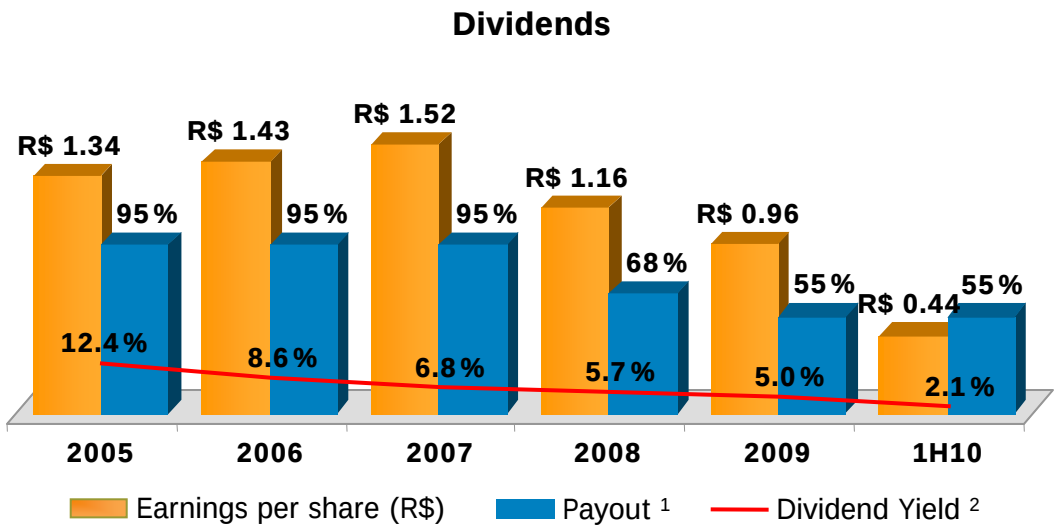

Accomplished / expected CAPEX and corresponding financing sources (R$ million)

Note:
[1] Considers new accounting procedures.
[2] Does not consider interests incurred during the construction.

Dividend policy

- By-law minimum payout: 30% of payable net income.
- Management commitment: minimum payout of 55% of payable net income.
- Payment frequency: semi-annual.

Note:
[1] Considers the annual net income, which is higher than the payable value.
[2] Based on volume-weighted market price of ON shares in the period.

- On October 15, 2010 R$ 286.1 million in the form of interim dividends will be paid out (R$ 0.438 per share), the shares becoming ex-dividends on October 1st. This amount stands for a 55% payout for the 1H10's net income, which totaled R$ 520.2 million.

Adjustments in the assets transfer model

Tractebel, along with its parent company, will hold a meeting with investors and capital market professionals to disclose initiatives in its governance to be applied to related party transactions.

Date: October 1, 2010

Time: 9 AM

Venue: InterContinental São Paulo hotel, at Al. Santos, 1,123

Remote Access: Teleconference and Webcast

- Teleconference

  - from Brazil (audio in Portuguese): (11) 4688-6361;

  - from the US: (1 888) 700-0802;

  - from outside US: (1 786) 924-6977;

  - password for all: Tractebel Business Day.

- Webcast

  - Link will be available at Tractebel's website (www.tractebelenergia.com.br), Investor section.

Competitive advantages

ATTRACTIVE INDUSTRY
- ✓ Defensive profile in critical times
- ✓ Growing energy prices

PREMIUM RATING
- ✓ "brAA+" and "AA+(bra)" - rated recent issue in national scale by S&P and Fitch, respectively
- ✓ Also corporate AA-rated for several years

INDUSTRY LEADERSHIP
- ✓ Largest private generator
- ✓ Market cap: R$ 13.8 billion
- ✓ Controlled by GDF SUEZ, world leader in energy

HIGH-CALIBER CORPORATE GOVERNANCE
- ✓ Experienced executives
- ✓ Discipline track record in investment decisions

CLEAR COMMERCIAL STRATEGY
- ✓ Heavy contracting in the next years
- ✓ Diversified portfolio between free customers (over different industries) and regulated ones (distribution companies)

STABLE FINANCIAL PERFORMANCE
- ✓ Strong cash flow
- ✓ Average EBITDA margin at 60% +
- ✓ Consistent net income

CASH FLOW PREDICABILITY
- ✓ Inflation-indexed contracts
- ✓ Hydro basis, complemented by thermal and wind

HIGH OPERATIONAL PERFORMANCE
- ✓ Benchmark indexes of availability
- ✓ ISO 9001 (quality management) and 14001 (environment management) certified plants

Attachments

Thermal side: exposure to spot prices

→ Estimated commercial capacity (on a yearly basis)

→ Thermal substitution energy → purchase in spot market

→ Expected minimum dispatch due to an annual inflexibility (based on the purchase of some 230,000 tons of coal a month)

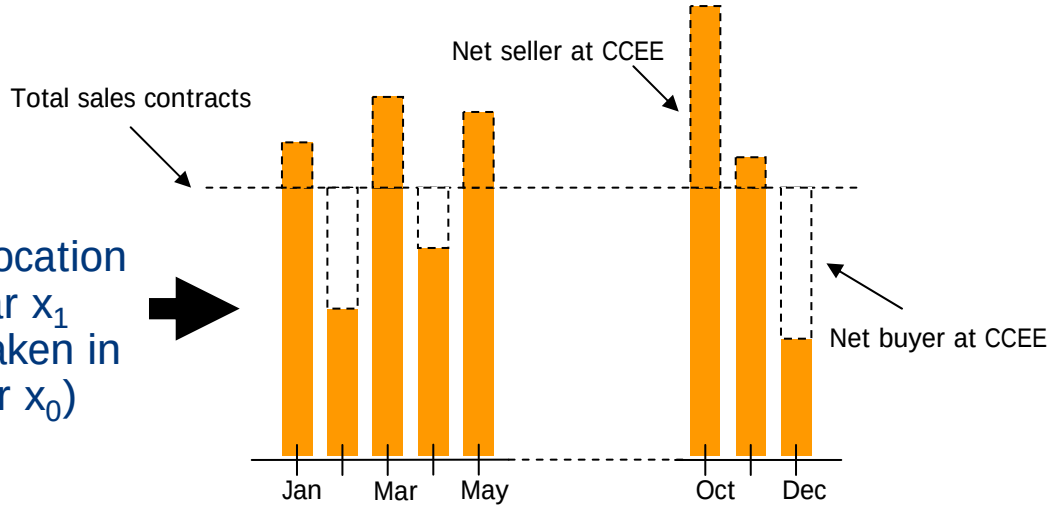

Notes: 1) Tractebel Energia has been fully contracted → purchase of thermal substitution energy.
2) On a monthly basis, inflexibility variations may occur.
3) Figures related to the Energy Trading Board (CCEE) settlement point.

Hydro gencos monthly allocation of resources

How does the allocation of resources at CCEE (the energy trading board) over the months interfere with a hydro genco quarterly results?

Annual Hydro Resources

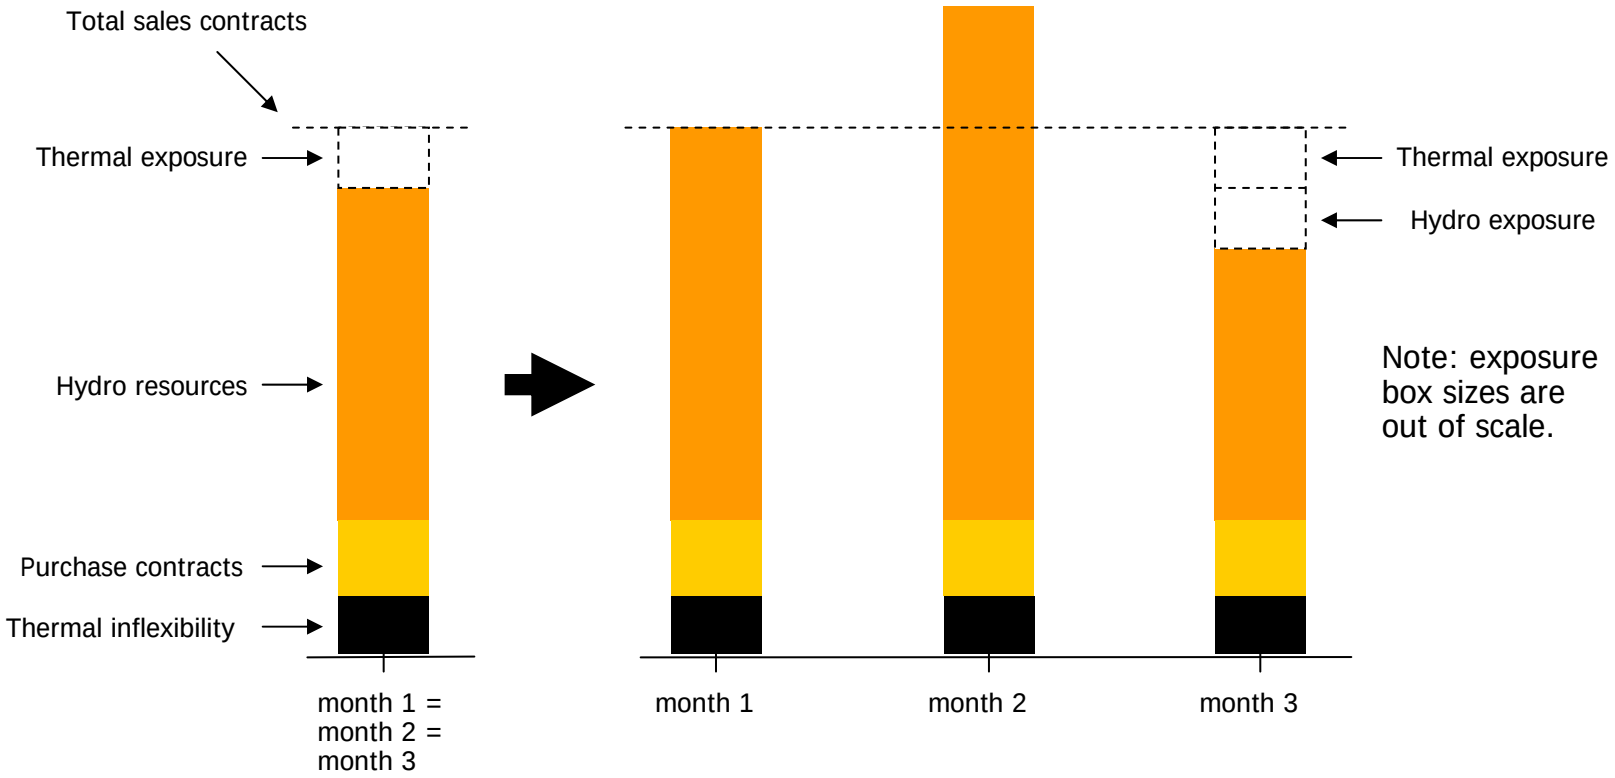

monthly allocation over year x_1 (decision taken in Dec. year x_0)

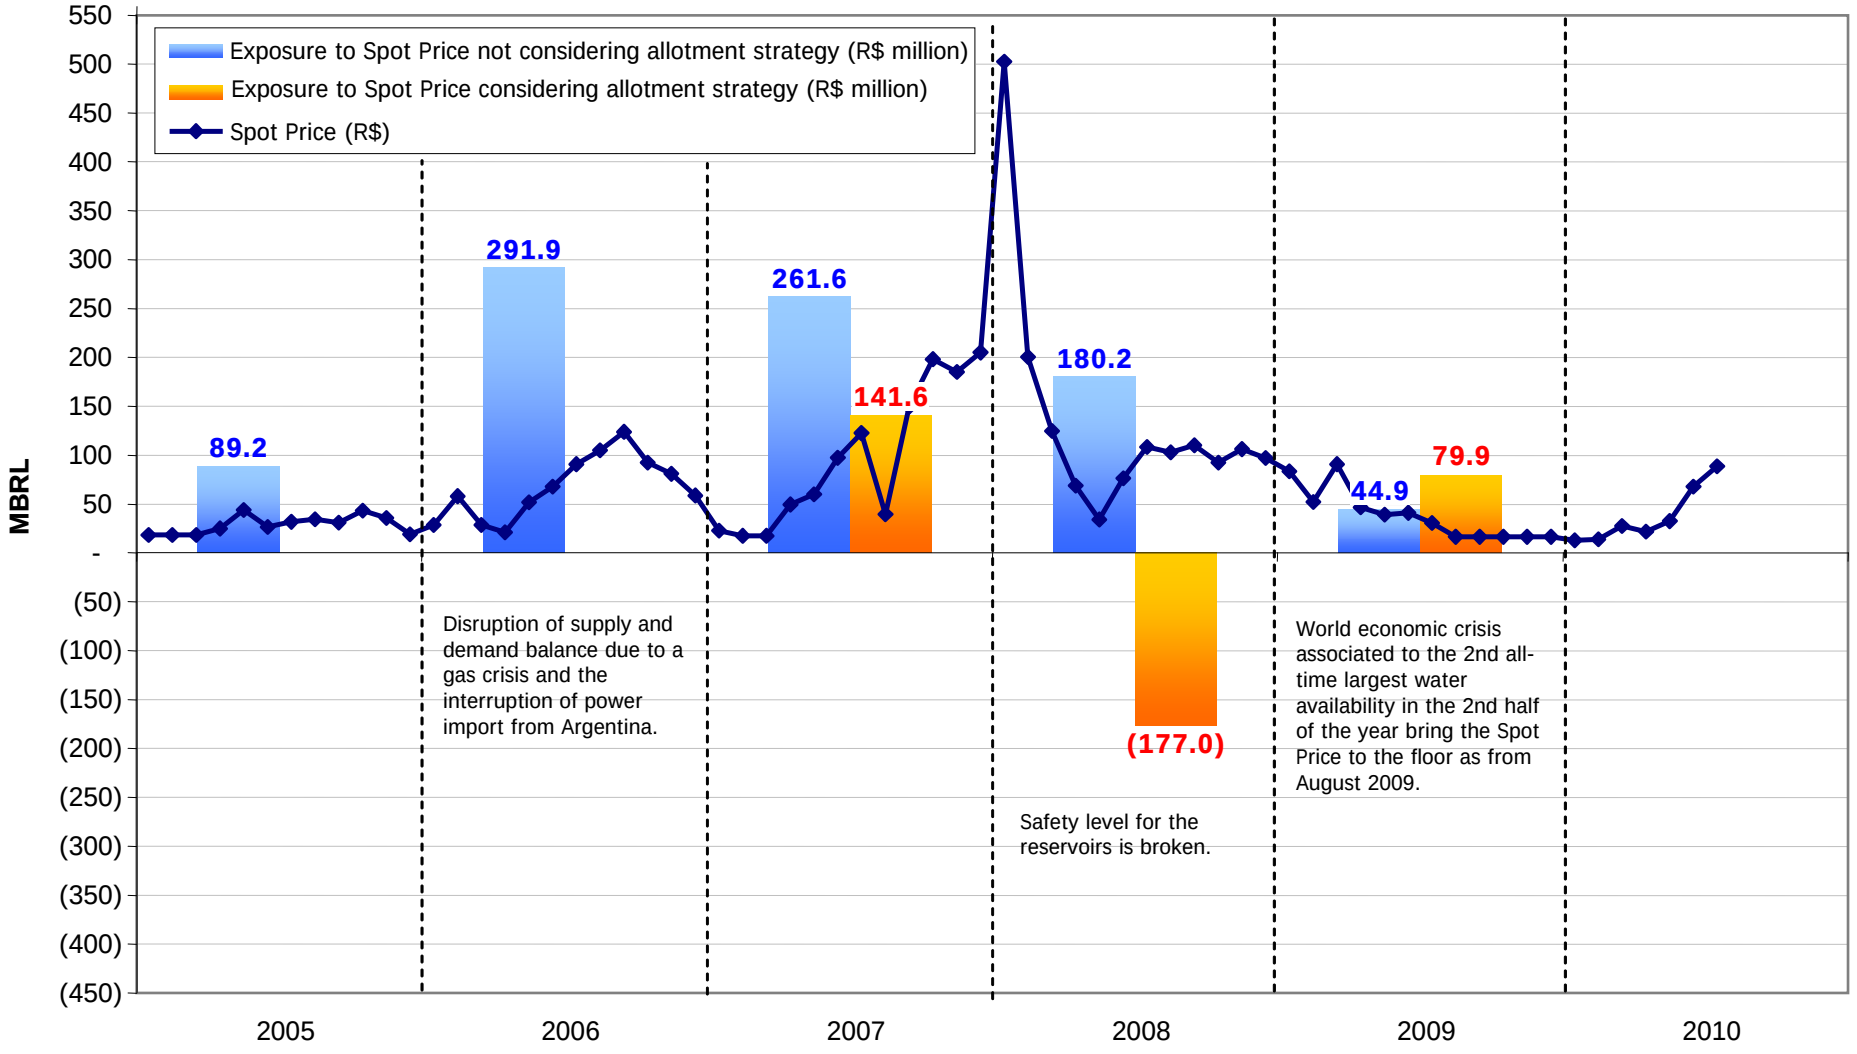

- Hydro gencos can freely allocate their resources over the following year's months;
- Monthly fluctuations on sales is also a driver for exposure to spot price;
- Monthly energy differences are settled at spot price, i.e., PLD (Price for Settlement of Differences);
- As penalties apply for a net buyer, a "monthly closing" market is available for those gencos who need to cover up their position;
- The pricing for the "monthly closing" market is strongly linked to the spot price.

Mechanisms to mitigate exposure from the thermal side

As a consequence of the two previous slides, an appropriate monthly allocation of the hydro resources over the year can mitigate the exposure arising from the thermal substitution energy to be purchased at spot price. An example follows:

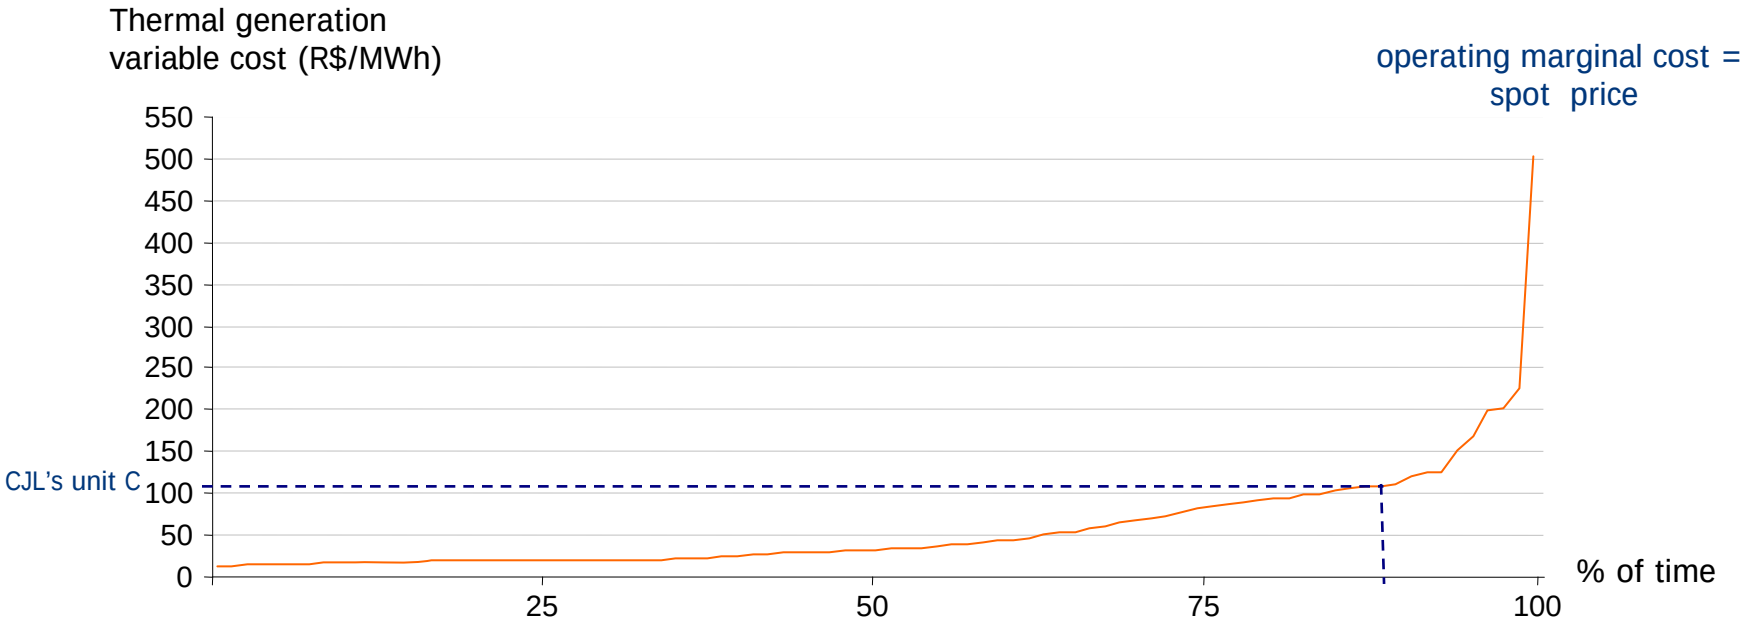

Expenses: impacts of energy allotment (2007 thru 2009)

Main drivers and distribution curve of spot prices

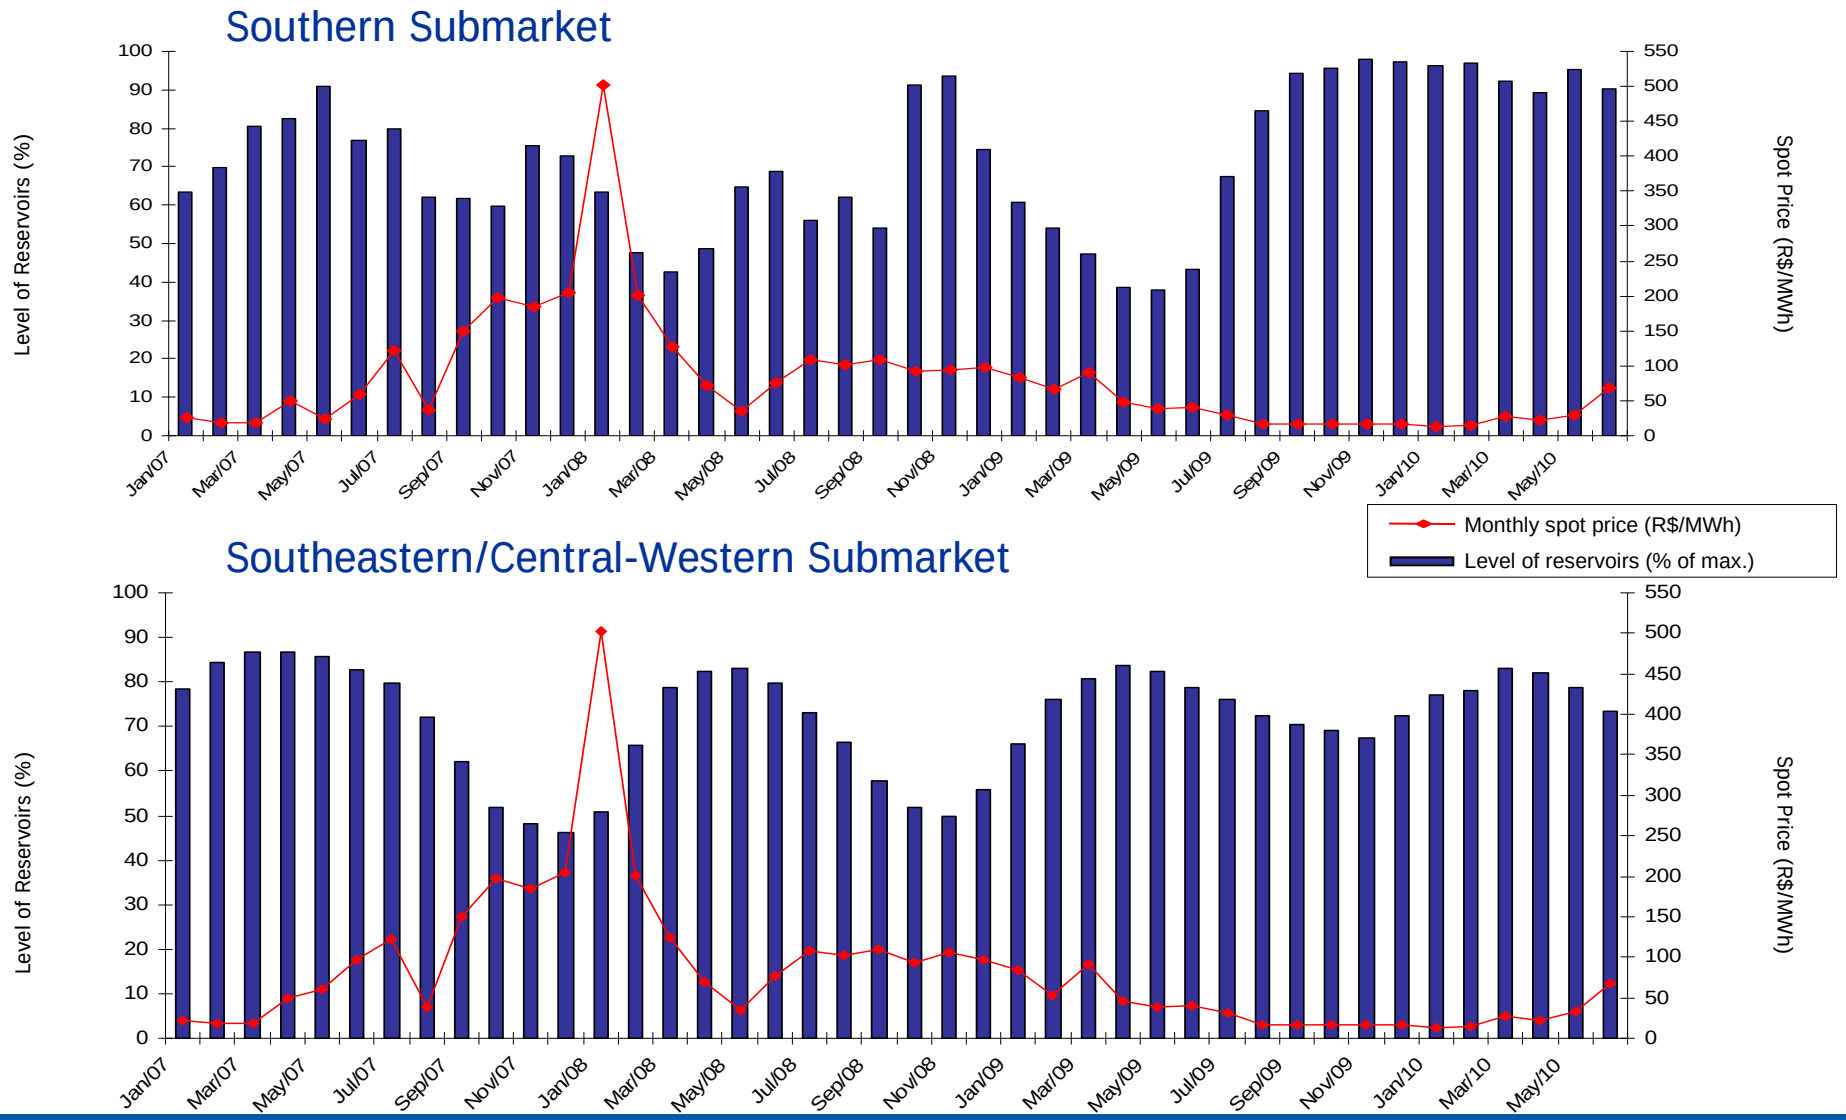

- Reservoir levels of hydro plants;
- Rainfall behavior;
- Forecast of demand for power;
- Current and future availability of power plants and transmission lines;
- Availability of natural gas.

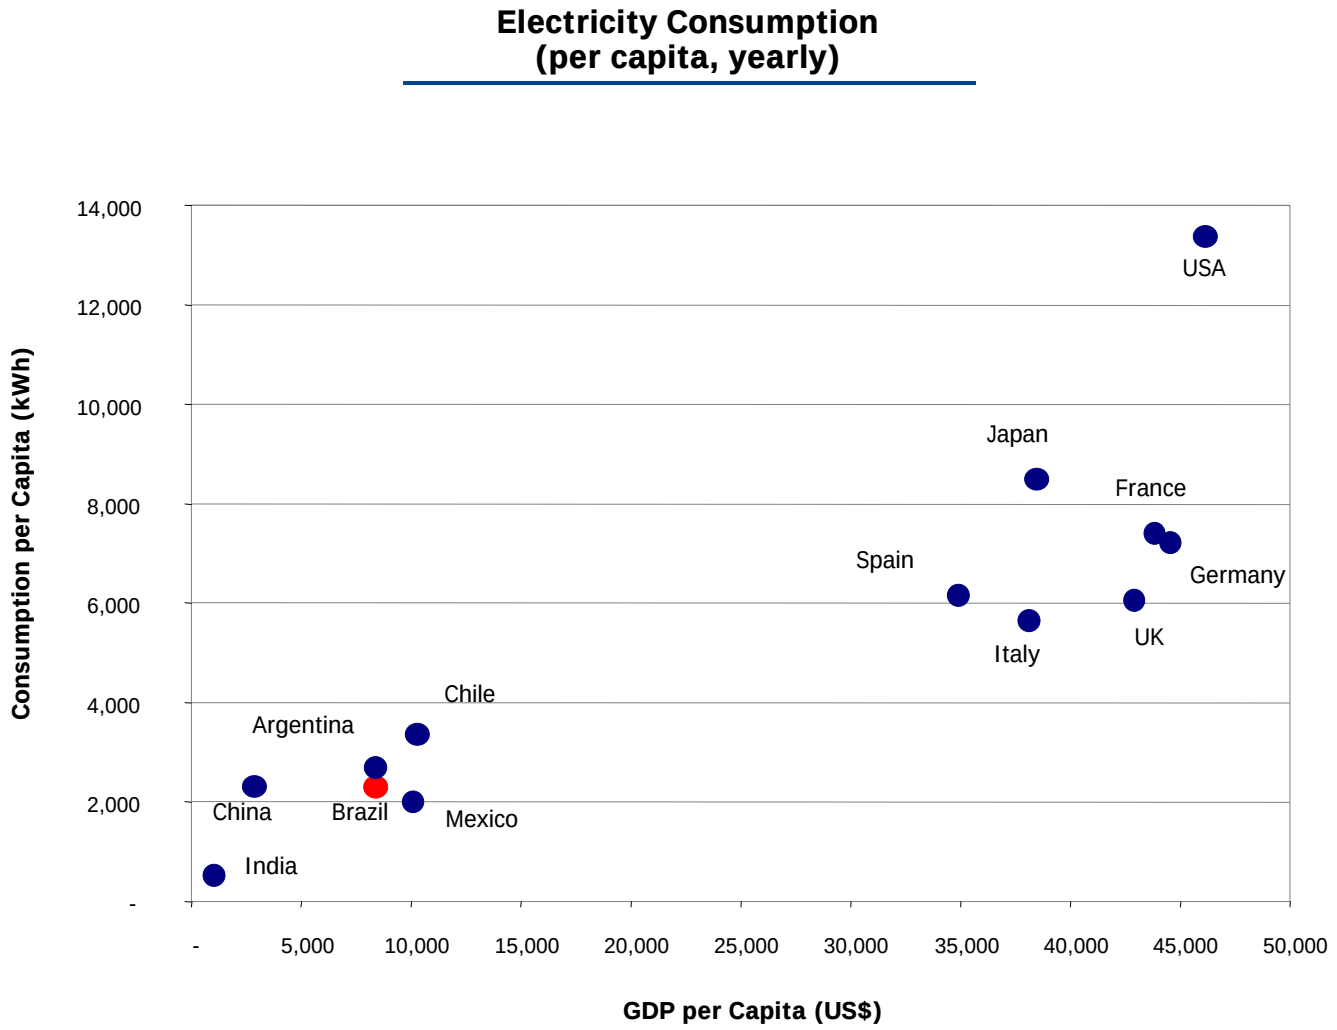

Note: spot market monthly prices for SE-CW submarket from May 2003 to July 2010.

Conclusion: For 63% of the time the spot price is lower than R$50/MWh, and for 89% of the time it is lower than R$110/MWh.

Correlation between reservoir levels and spot prices

Electricity: large growth potential
