Highlights, Shareholding Structure, Market Share, Assets and Sales

Highlights

Main financial and operational indexes:

(in R$ million)	2Q15	2Q14	Chg.	6M15	6M14	Chg.
Net Revenue from Sales (NRS)	1,544.9	1,364.8	13.2%	3,162.8	3,007.8	5.2%
Results from Operations (EBIT)	437.0	152.5	186.6%	1,080.1	698.9	54.5%
EBITDA (1)	586.0	301.5	94.4%	1,375.8	995.6	38.2%
EBITDA / NRS - (%)(1)	37.9	22.1	15.8 p.p.	43.5	33.1	10.4 p.p.
Net Income	209.3	73.7	183.8%	554.0	363.0	52.6%
Net Debt (2)	2,079.1	2,409.0	-13.7%	2,079.1	2,409.0	-13.7%
Power Production (avg MW) (3)	4,279	5,104	-16.2%	5,122	5,413	-5.4%
Energy Sold (avg MW)	4,086	4,158	-1.7%	4,165	4,191	-0.6%
Average Net Sales Price (R$/MWh) (4)	170.1	148.2	14.8%	168.7	146.4	15.3%
Number of Employees	1,174	1,125	4.4%	1,174	1,125	4.4%

Notes:
[1] EBITDA represents: net income + income tax and social contribution + financial results + depreciation and amortization.
[2] Adjusted amount, net of gains from hedge operations.
[3] Total electricity output from the plants operated by Tractebel Energia.
[4] Net of taxes and exports.

Highlights (cont`d)

GDF SUEZ adopted the corporate brand name of ENGIE in response to the energy transition, which is accelerating, as well as changes in the electric energy sector worldwide.

Aneel authorized the number 5 turbogenerator of the Ferrari Thermoelectric Power Plant to begin commercial operations, thus ramping up the Company's installed capacity by 15 MW.

Tractebel Energia became a component of the Euronext-Vigeo EM 70 index, encompassing companies with a premium performance in corporate responsibility in developing countries.

Ibama issued an Installation License for Pampa Sul TPP.

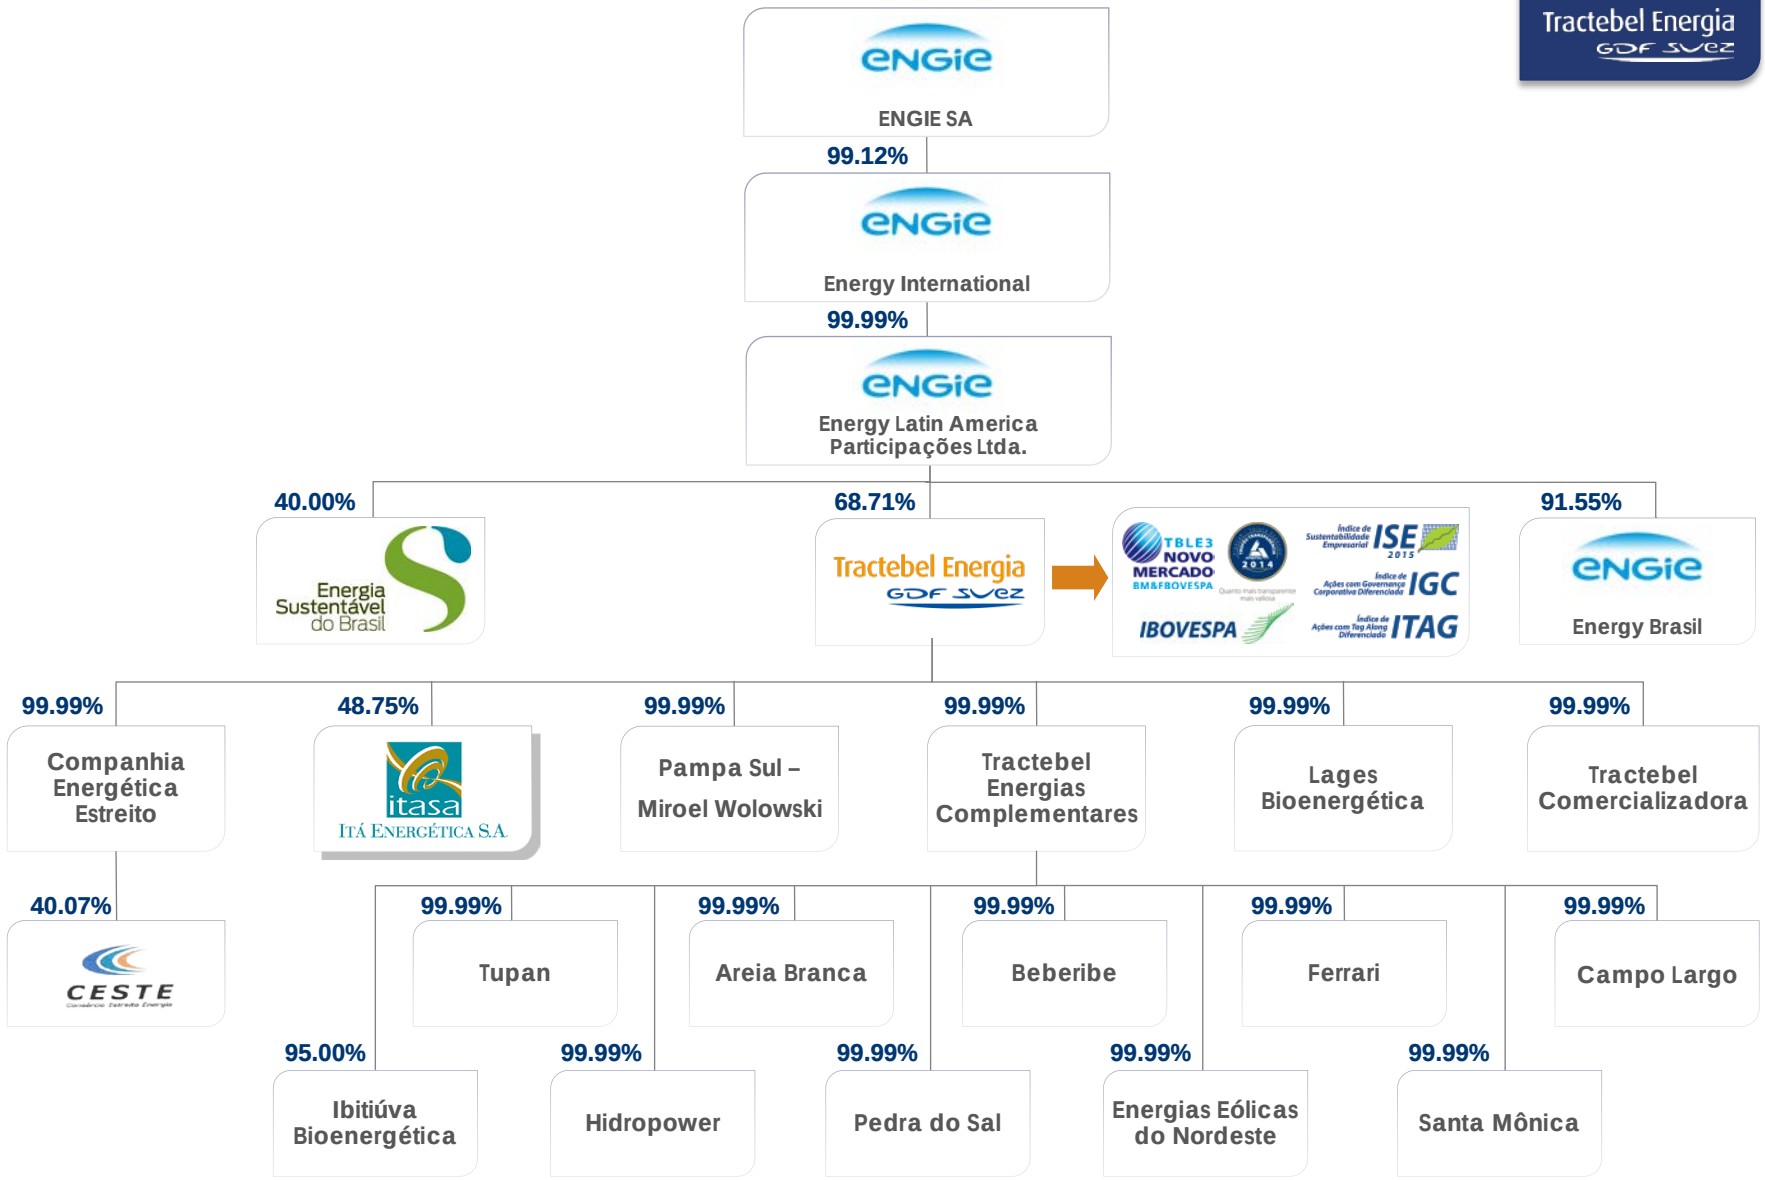

Highlights (cont`d) – subsequent event

The Brazilian Association of Independent Power Producers (Apine), of which Tractebel Energia is a member, obtained an injunction regarding the GSF under which the 20th Federal Court of Brasília "determined that until all appeals in this action have been exhausted, Aneel shall abstain from taking steps to adjust the MRE in relation to the members of Apine herein substituted, should there be total generation of the Energy Reallocation Mechanism ("MRE") in an amount less than the physical guarantee of these same members".

Also on the GSF issue, the public hearing held by Aneel has ended and a solution is expected for the next months.

Approved, by the Company's Board of Directors, the distribution of R$ 311.3 million (R$ 0.4769 per share) in the form of interim dividends corresponding to 55% of the adjusted net income for the 1H15.

Shareholding structure of Tractebel Energia

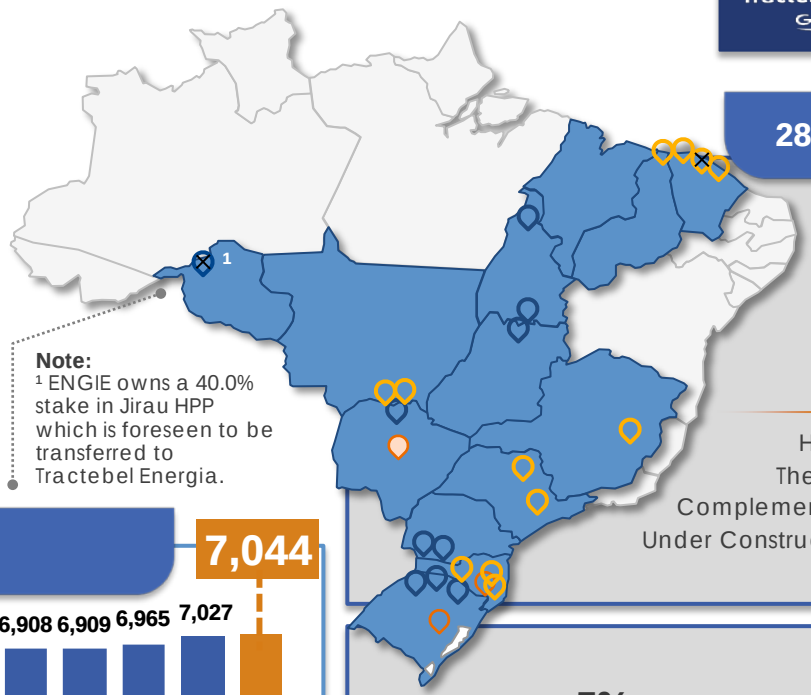

Simplified version

Diversified portfolio of assets, with strategic location

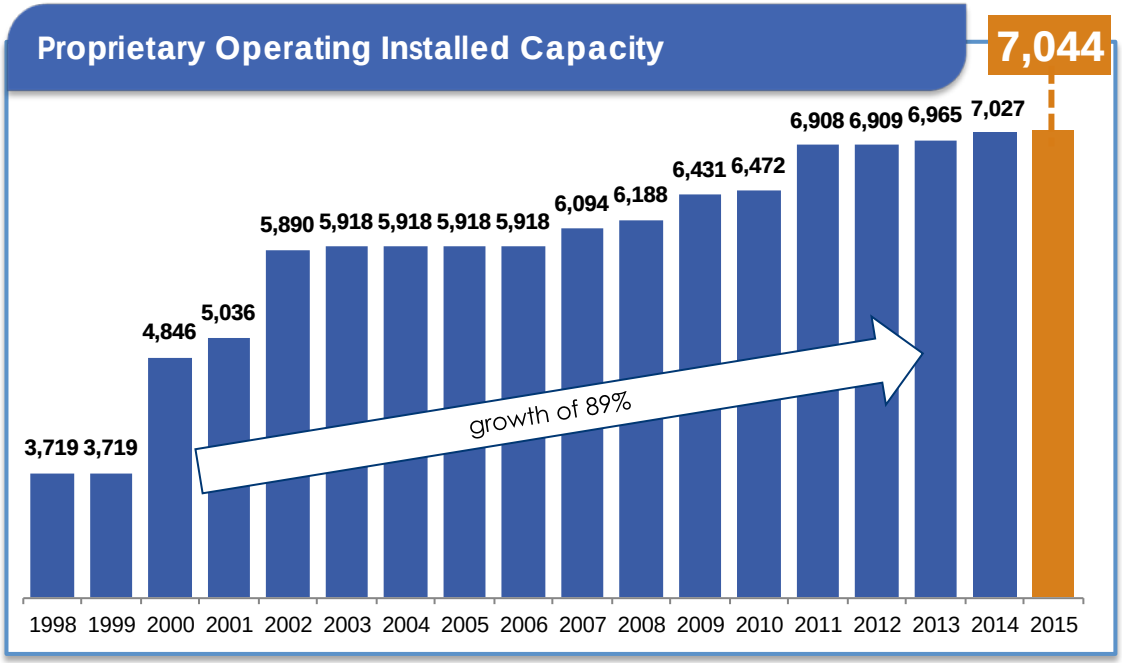

Tractebel Energia
GDF SUEZ

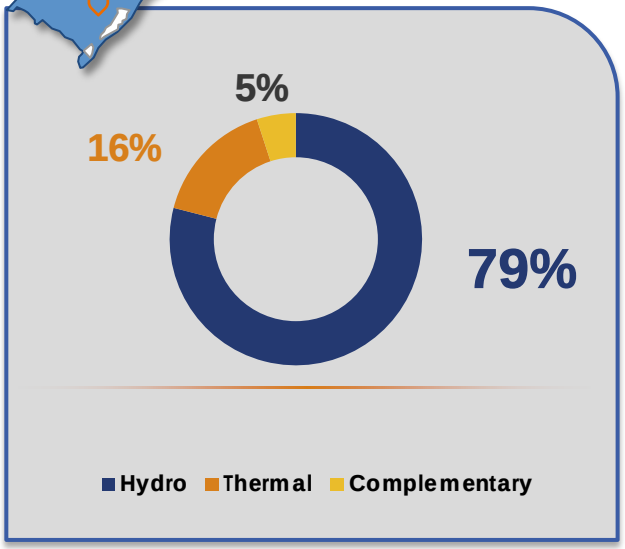

Own installed capacity of
7,044.3 MW from 28 plants
operated by the Company in a diversified portfolio

Note:
[1] ENGIE owns a 40.0% stake in Jirau HPP which is foreseen to be transferred to Tractebel Energia.

Proprietary Operating Installed Capacity

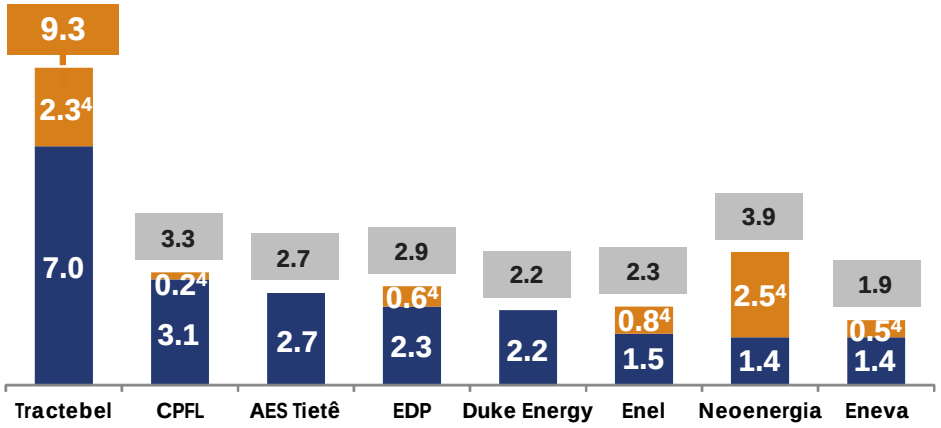

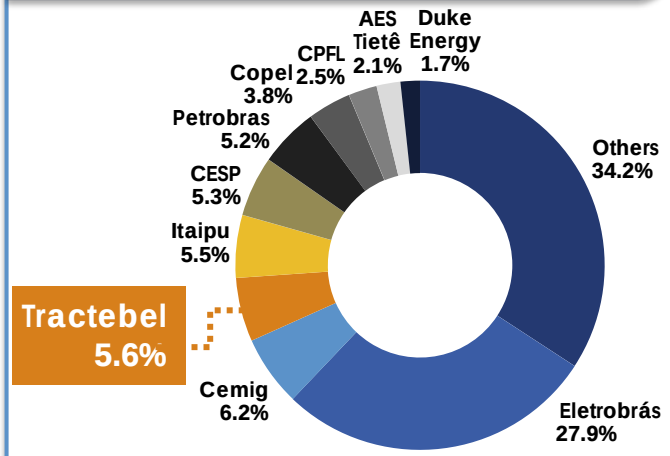

Leading position in the generating sector

Tractebel Energia is the largest private player in the Brazilian generating market...

Private Sector – Installed Capacity[1] (GW)

Brazil – Existing Installed Capacity[2,3]

Source: Aneel, Companies' websites and in-house studies.

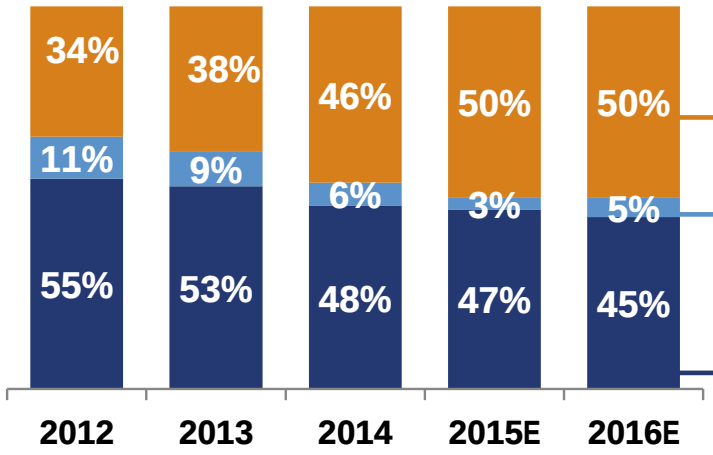

Notes:
[1] Apparent sum-related errors are a result from rounding of addends.
[2] Amount corresponding to SIN – National Interlinked System.
[3] Includes only the Brazilian part of Itaipu.
[4] Installed capacity under construction based on information from Aneel, ONS and internal study. For Tractebel, the figure includes the plants under construction according to slide 38 of this presentation.

...and is well positioned to capture business opportunities.

Diversified portfolio among distribution, free customers and trading companies

Tractebel Energia GDF SUEZ

Client Breakdown (based on contracted energy)[1]

Distribution Companies
Trading Companies
Free Customers

First to consistently serve the free market...

- Flexibility (prices, terms and conditions) → Maximizes portfolio's efficiency
- Opportunistic contracts (purchase/sale) → Product assembly
- Largest consumer market
- Regulated and unregulated contracts → Long-term cash flow predictability

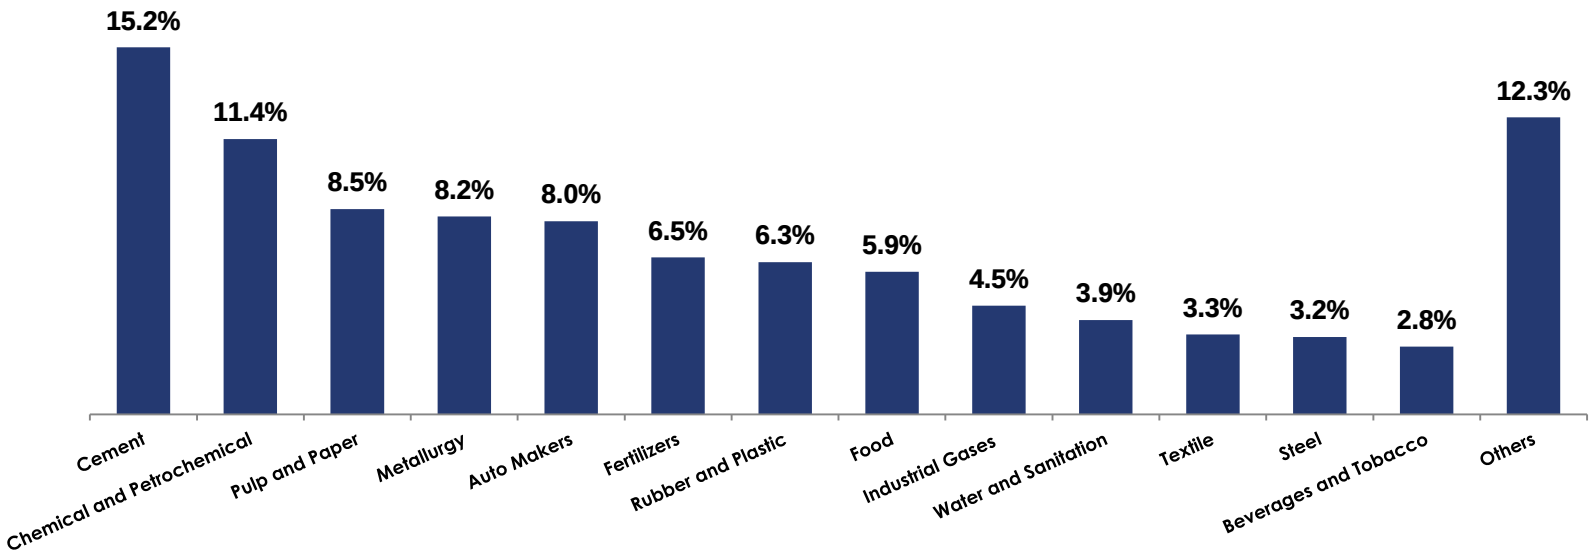

... to minimize risks and to maximize portfolio's efficiency.

Note:
[1] The figures have been reclassified. Effective in the 3Q12, the Company is now showing sales to the trading companies which allocate purchased energy exclusively to their production units as sales to free consumers and no longer to trading companies.

Diversification also within the free customers portfolio

Free customer industry diversification and a strict credit assessment policy allow for a zero default reality.

Free customers total sales volume for 2015: 2,071 average MW

Source: Internal study based on IBGE's classification.

2.

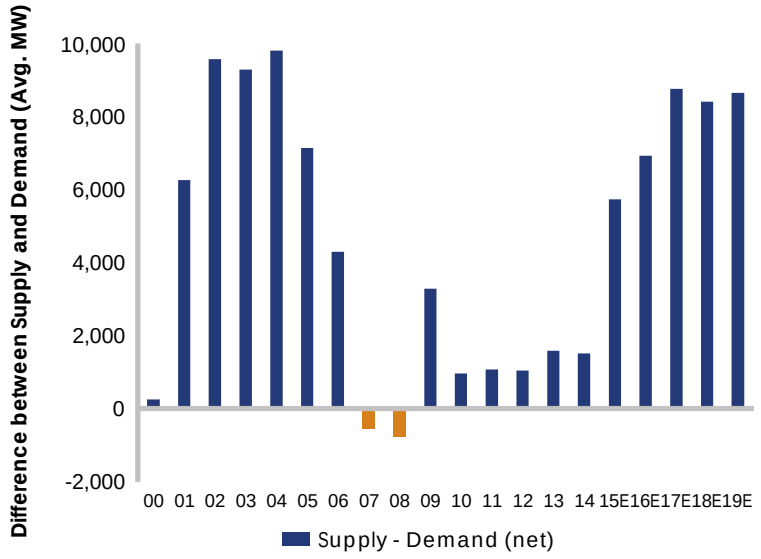

Energy Market in Brazil

Demand review provides for improvement in the short term balance, however fundamentals of industry indicate rising prices in the long term

Tractebel Energia
GDF SUEZ

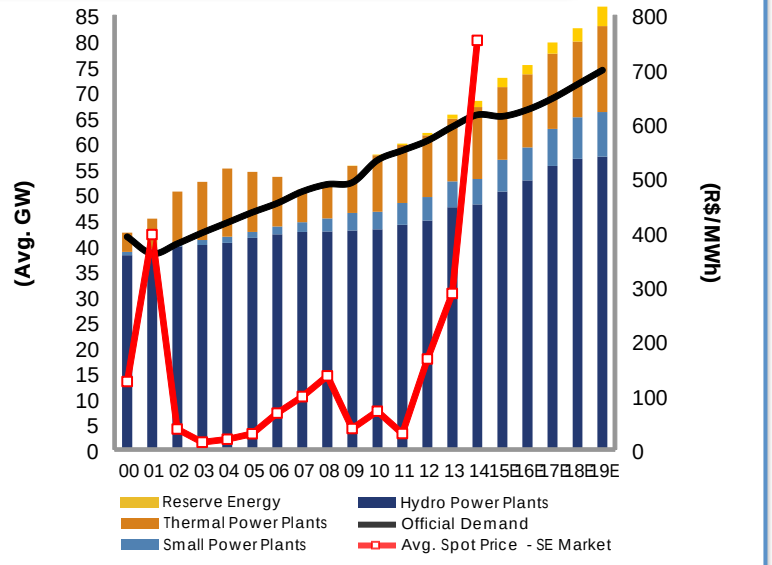

The income distribution reshaping, the increased thermal role and dispatch in the energy matrix, the delay in the implementation of greenfield projects, the preference for building low storage dams and the adoption of risk aversion procedures – as the change in PLD calculation – are pressuring the energy prices in the future, which shall continue on the rise, despite of the temporary decrease in consumption.

Energy Market Outlook

Source: Tractebel Energia's internal study based on ONS' Operations Monthly Program as of July 2015.

Supply Distribution by Source

Source: Internal study based on information provided by Aneel and ONS.

3.

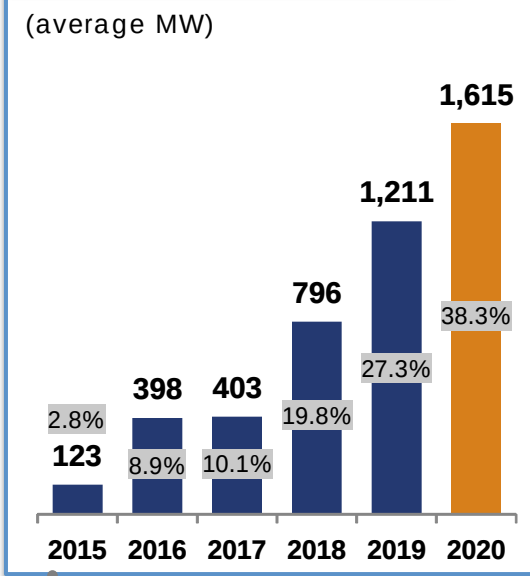

Sales Strategy

Tractebel`s commercial strategy considers the gradual sale of future availability

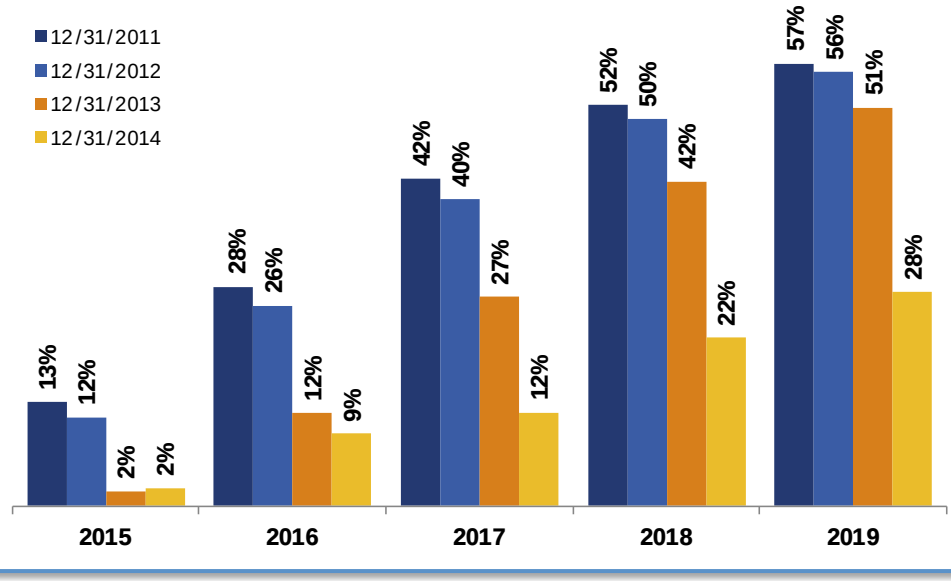

Tractebel Energia GDF SUEZ

As the time goes by, the Company is able to better foresee the market conditions in a given year ahead and, as a result, to finetune the amount of uncontracted energy.

Tractebel Energia's Uncontracted Energy[1]

Tractebel: Uncontracted Energy Compared to the Availability of a Given Year

Note:
[1] Percentage of total resources.

Energy balance

Tractebel Energia GDF SUEZ

*** XXXX-YY-WWWW-ZZ, where:**
XXXX -> year of auction
YY -> EE = existing energy or NE = new energy
WWWW -> year of delivery start
ZZ -> supply contract duration (in years)

***1: Sales price is net of ICMS and taxes over revenue (PIS/Cofins, R&D), as of 06/30/15, i.e. future inflation is not considered.**
***2: Purchase net price, considering benefits from PIS/Cofins credits, as of 06/30/15, i.e. future inflation is not considered.**

Notes:
- The balance refers to the settlement point.
- The average prices are considered simply estimates and are based on financial planning revisions, not capturing volume changes, which are updated quarterly.

4.

Expansion

Hydro project under construction: **Jirau** | project update

Tractebel Energia GDF SUEZ

3,750 MW project, out of which 40.0% held by ENGIE

- 50 units x 75 MW each
- assured energy: 2,185 aMW

73% contracted under 30-year PPAs - indexed by inflation

Balance of energy available to be sold by the shareholders

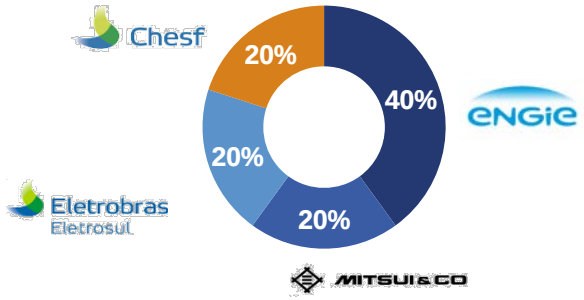

Aneel's decision already granted 52 days + synchronization with the high voltage transmission line

Legal decision also issued in the First Instance (recognition of 535 days of force majeure)

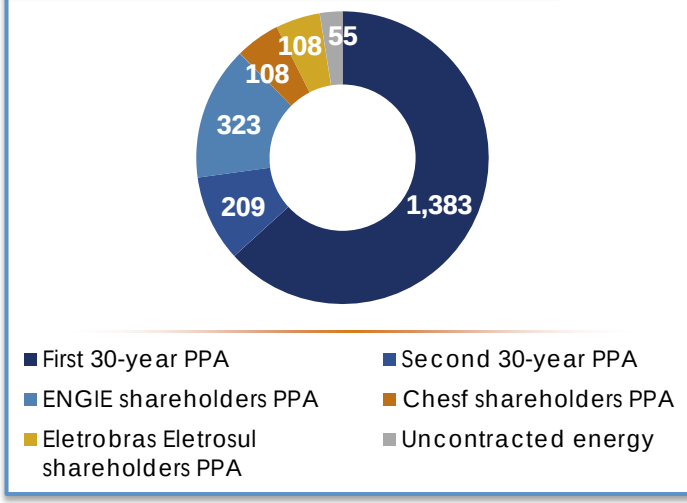

Financing conditions

- BNDES total financing: R$ 9.5 billion (initial R$ 7.2 billion + R$ 2.3 billion):
  - interest rate: TJLP + spread
  - amortization: 20 years
- spread: from 2.1% to 2.6%
- 100% of the debt is financed by BNDES, from which 50% is indirectly financed through a syndicate of banks

ESBR shareholders

ESBR PPA`s portfolio a MW (2016 view)

Hydro project under construction: **Jirau** | project update

Project status

- 32 units in commercial operation and 2 units synchronized to the National Interlinked System - SIN
- 2 additional units under commissioning and 9 units under assembly
- full assured energy achieved following the COD of the 33rd unit, to be approved in the coming weeks
- by achieving its total assured energy, Jirau will be fully compliant with its commercial obligations despite of the final resolution on the number of days of force majeure
- Jirau currently responds to 10% of the electricity demand in the Southeast of Brazil (the country`s largest load center)

Options to create additional value

- additional assured energy (ex.: recalculation of hydraulic losses, etc.)
- operation of reservoir at constant levels
- additional long term tax incentives in the region

General view of Jirau HPP
Jun/2015

Hydro project under construction: **Jirau** | project update

Power house – left bank – downstream view (Jun/15)

Thermal project under construction: **Pampa Sul TPP**

After commercializing in an A-5 Auction 294.5 avg. MW at R$ 201.98/MWh for a term of 25 years, as from January 1, 2019, the Company started the construction of Pampa Sul TPP in Candiota (RS). The facility will fire thermal coal from reserves also located in Candiota and will connect to the National Power Grid System (SIN) through an existing transmission line.

Project description

3D image from the Pampa Sul TPP project.

Pampa Sul TPP – RS

Installed Capacity: 340.0 MW
Commercial Capacity: 294.5 aMW
Investment (R$mm)[1]: 1,800
Start of construction: 2015
Start of operation: 2019
EPC contractor: SDEPCI
Annual Fixed Revenue (R$mm): ~ 473.3
Installation License: June 19, 2015

Note:
[1] Approximated value.

Wind project under construction: **Campo Largo Wind Complex**

Tractebel Energia GDF SUEZ

In an A-5 Auction, 82.6 avg. MW were sold at 135.47/MWh for a term of 20 years, as from January 1, 2019. This commercial capacity will come from six wind farms which add an installed capacity of 178.2 MW.

At the same time, aiming at the free market, another five wind farms will be constructed, adding 148.5 MW (~70 aMW), thus totaling 326.7 MW (~150 aMW).

Total **11** plants

Projects description

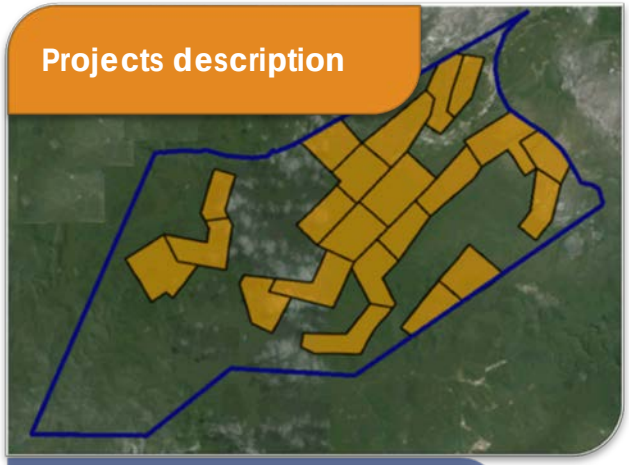

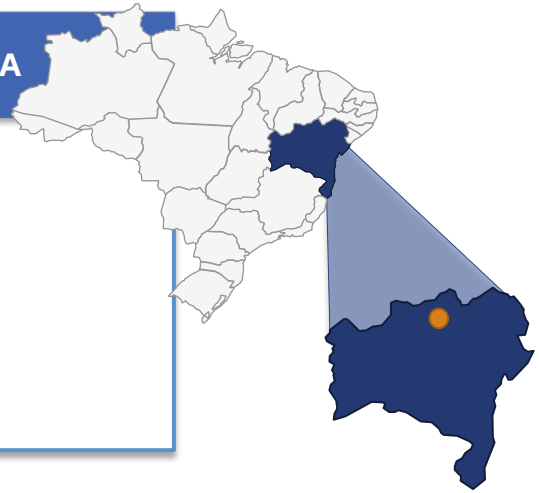

Image from the Campo Largo Wind Complex project.

Campo Largo Wind Complex - BA

Installed Capacity: 326.7 MW
Commercial Capacity[1]: 150 aMW
Investment (R$mm)[1]: 1,700
Start of construction: 2015
Start of operation: 2019
Nº of wind turbines: 121 (2.7 MW each)
Wind turbine manufacturer: Alstom
Annual Fixed Revenue (R$mm): ~ 95.8

Note:
[1] Approximated updated value.

The Company will invest approximately R$ 1.7 billion in the Complex, whose COD is expected for 2019.

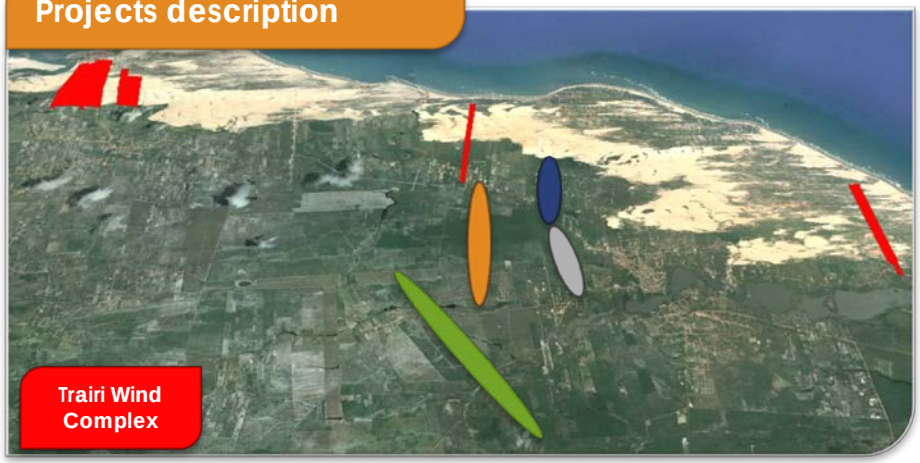

Wind project under construction: **Santa Mônica Wind Complex**

Tractebel Energia GDF SUEZ

Tractebel Energia is currently constructing, located alongside the Trairi Wind Complex (CE), the Santa Mônica Wind Complex. The project, comprised of four plants, will expand the non-renewable conventional power within its generating portfolio.

Total **4** plants

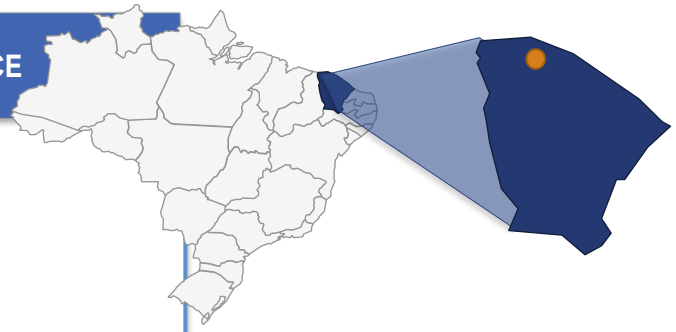

Projects description

Estrela (29.7 MW)	11 wind turbines
Ouro Verde (29.7 MW)	11 wind turbines
Cacimbas (18.9 MW)	7 wind turbines
Santa Mônica (18.9 MW)	7 wind turbines

Santa Mônica Wind Complex– CE

Installed Capacity: 97.2 MW
Commercial Capacity[1]: 47.8 aMW
Investment (R$mm)[1]: 460.0
Start of construction: 2014
Start of operation: 2016
Wind turbines manufacturer: Alstom

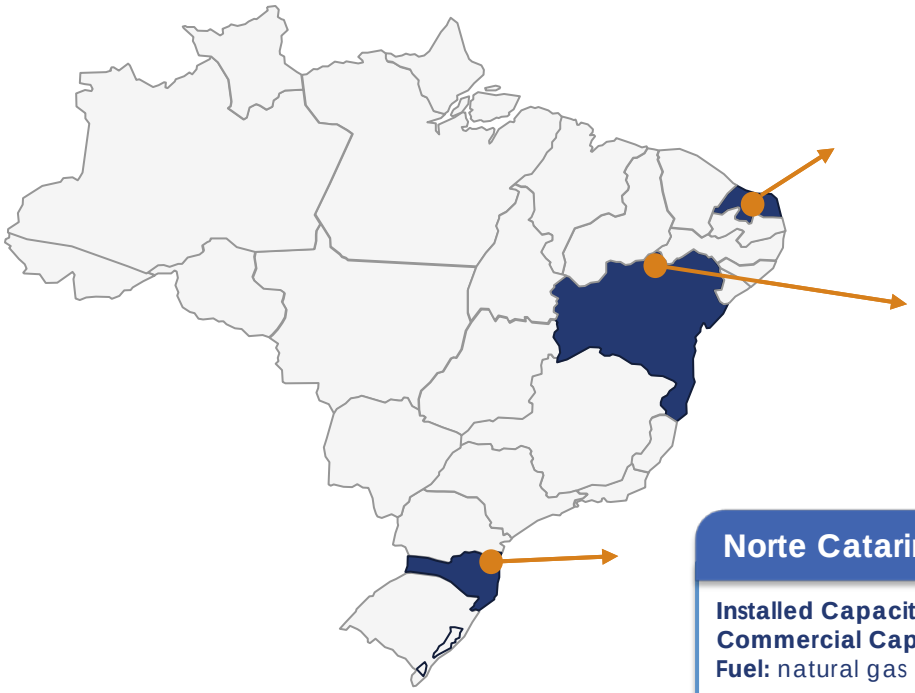

Note:
[1] Approximated value.

Projects under development

Tractebel has some projects in its portfolio which are currently under development. Some of them are presented below.

Projects description

Sto. Agostinho WC – RN

Installed Capacity: 600 MW
Commercial Capacity[1]: 300 aMW

Campo Largo WC – BA (Phase II)

Installed Capacity: 300 MW
Commercial Capacity[1]: 140 aMW

Norte Catarinense TPP – SC

Installed Capacity: 600 MW
Commercial Capacity[1]: 400 aMW
Fuel: natural gas

Note:
[1] Approximated value.

5.

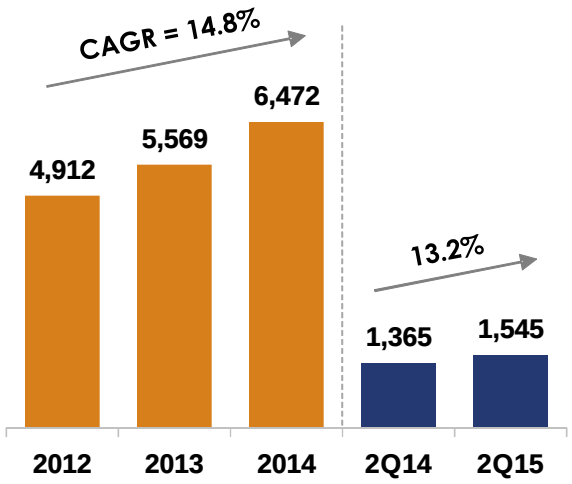

Financial Performance

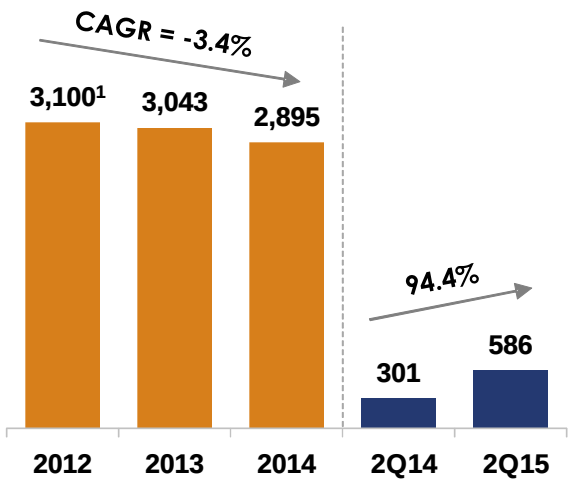

Solid financial performance

The efficiency in the management of client portfolio and the focus on sales strategies have been instrumental in driving revenue up. However, the recent instability in the electricity sector has refrained the Company from achieving the same positive effect on EBITDA and net income.

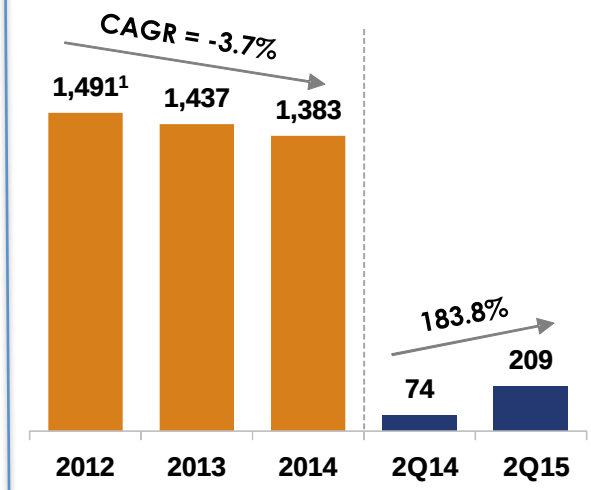

Net Revenue (R$ million)

EBITDA (R$ million)

Net Income (R$ million)

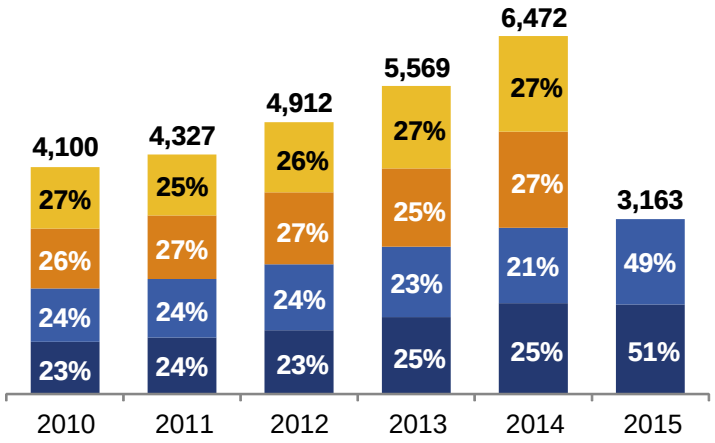

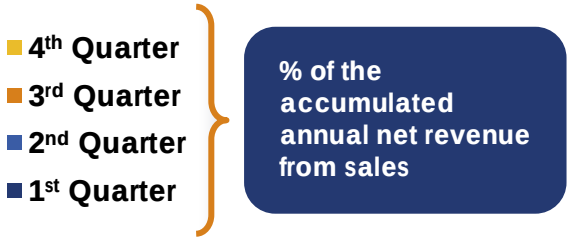

Note:
[1] Adjustment due to change in accounting practice.

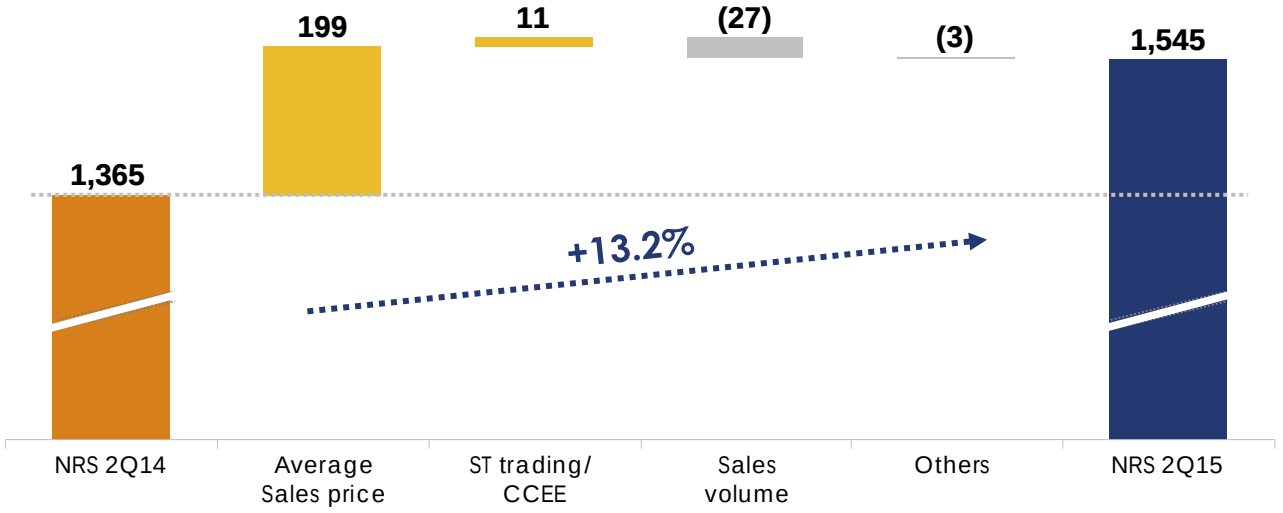

Net revenue from sales change (R$ million)

Tractebel Energia GDF SUEZ

Net revenue from sales change (R$ million)

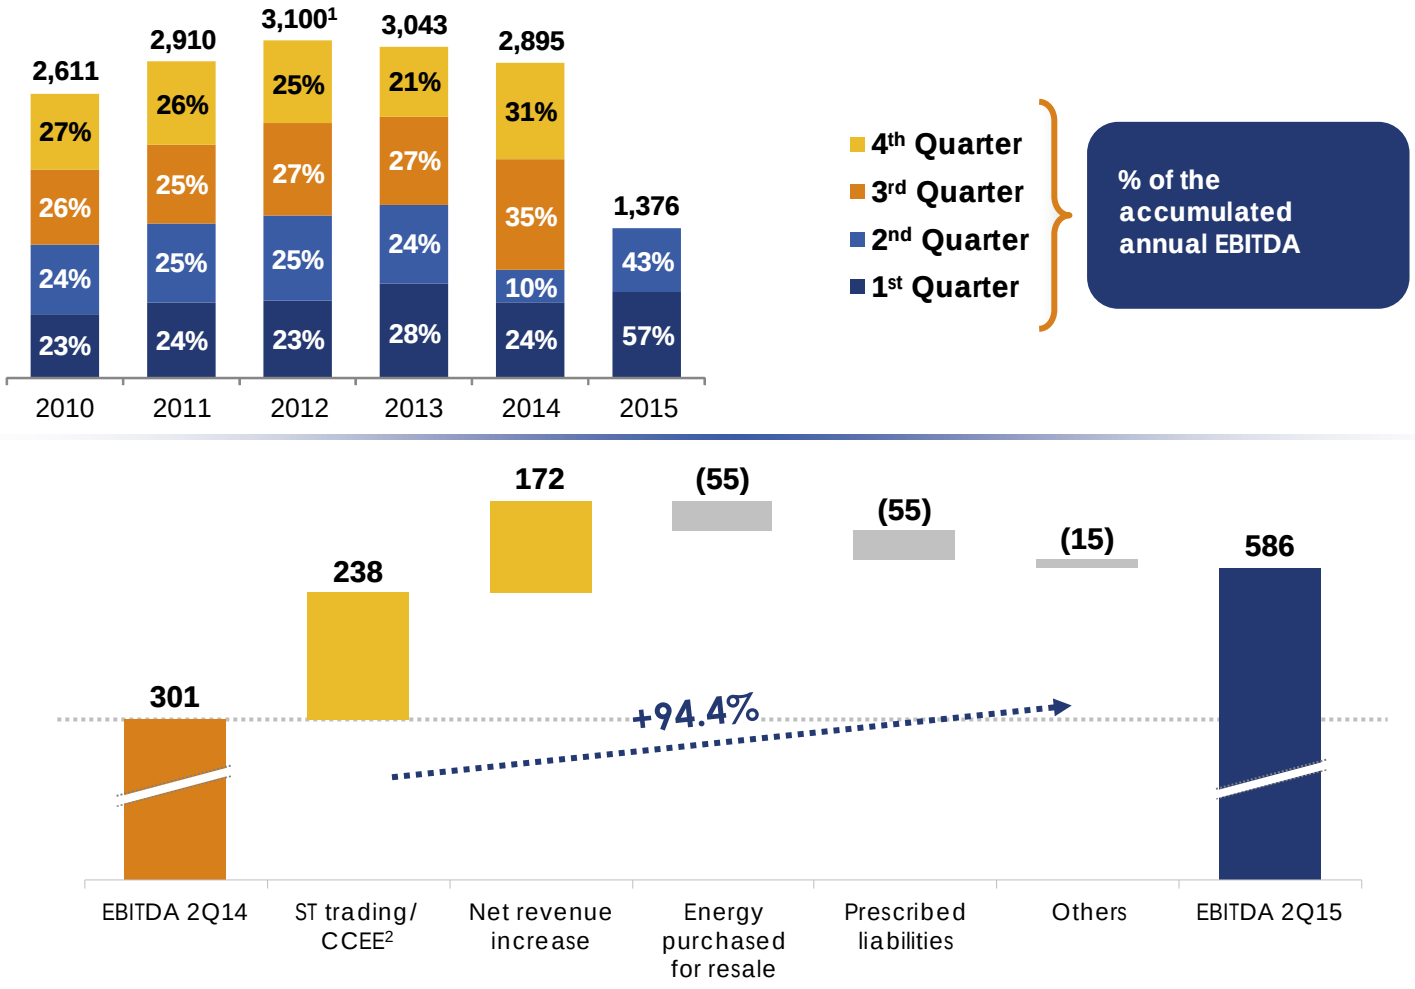

EBITDA change (R$ million)

Tractebel Energia GDF SUEZ

EBITDA change (R$ million)

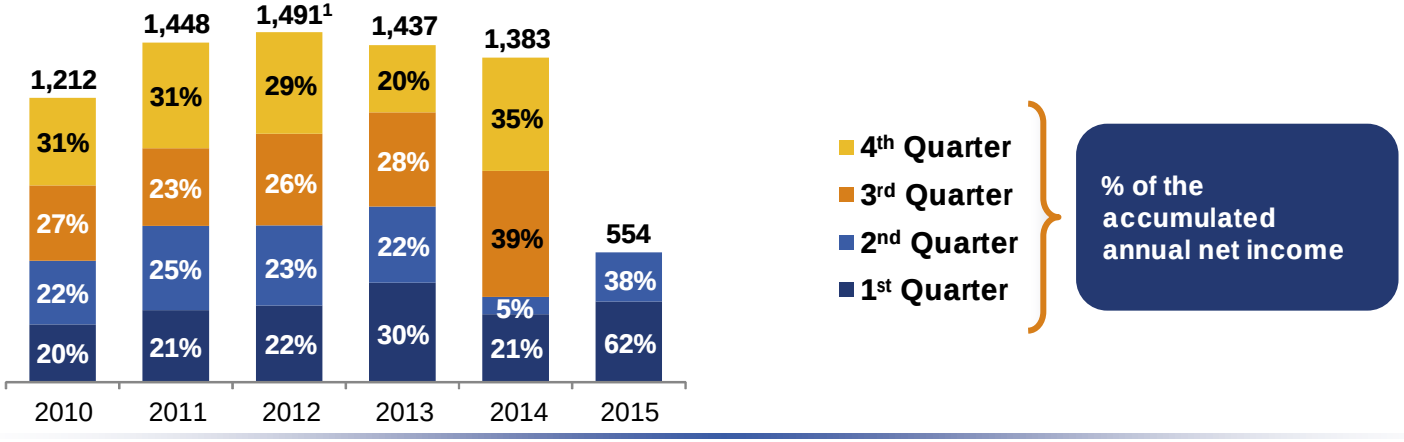

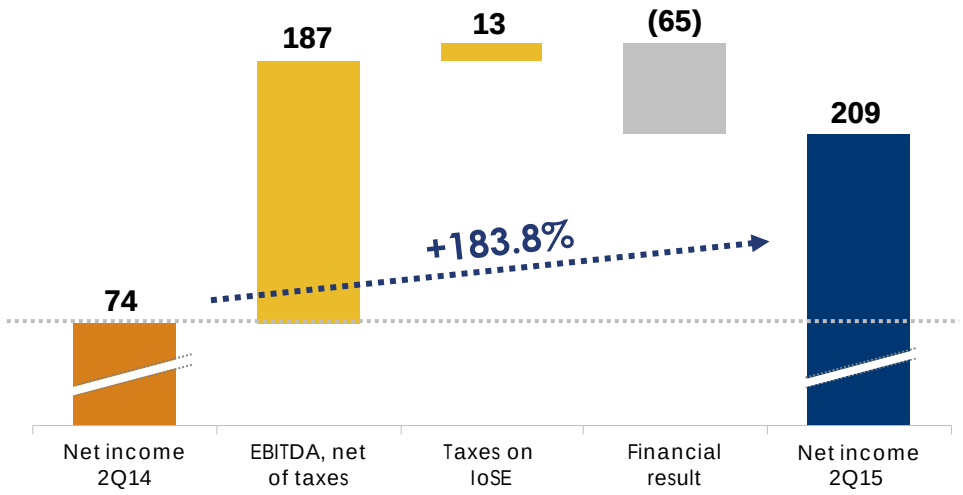

Notes:
[1] Adjustment due to change in accounting practice.
[2] Considers the combined effect of changes in revenue and expenses.

Net income change (R$ million)

Tractebel Energia GDF SUEZ

Net income change (R$ million)

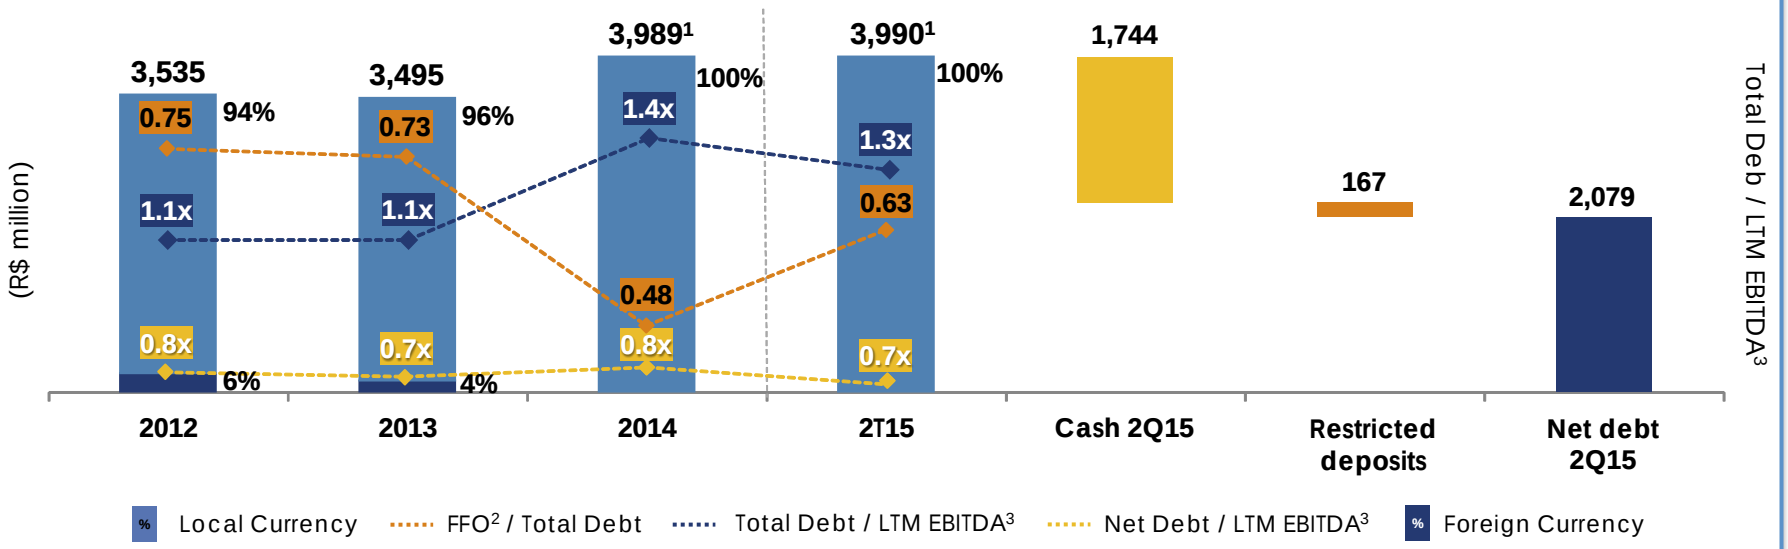

Note:
[1] Adjustment duo to change in accounting practice.

Limited indebtedness and low exposure to foreign exchange

Tractebel Energia GDF SUEZ

Low leverage enables Tractebel to benefit from growth opportunities.

Debt Overview (R$ million)

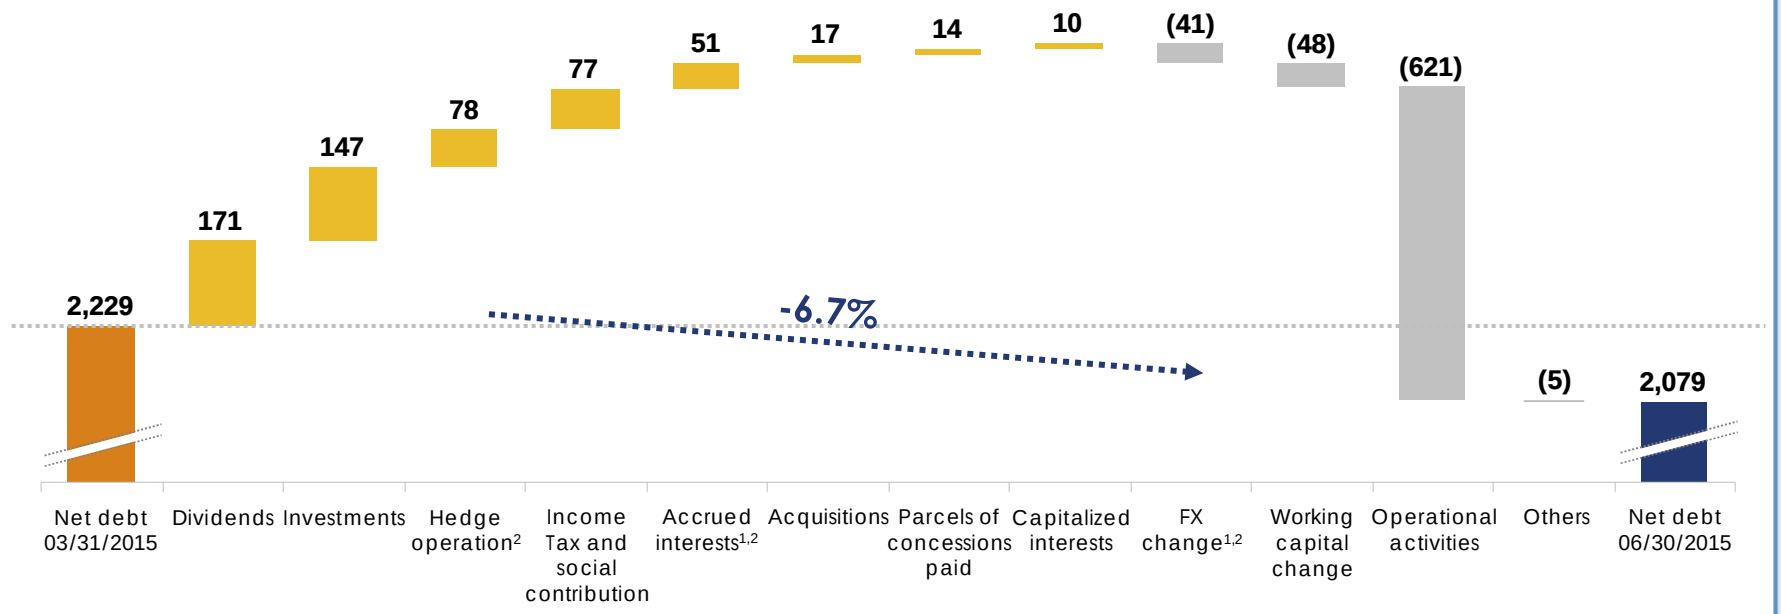

Notes:
[1] Net of gains from hedge operations.
[2] Funds from Operations.
[3] LTM EBITDA = last-twelve-month EBITDA.

Net debt change (R$ million)

Tractebel Energia GDF SUEZ

Net debt change (R$ million)

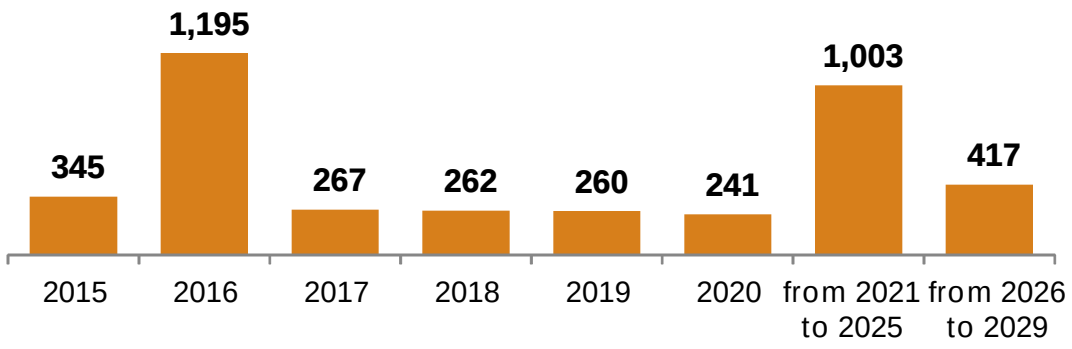

Notes:
[1] The interests and FX change refer only to the Company's financial debt (loans, financing and debentures).
[2] Does not impact the Company's cash position.

Medium and long-term debt, with low costs and defensive indexes

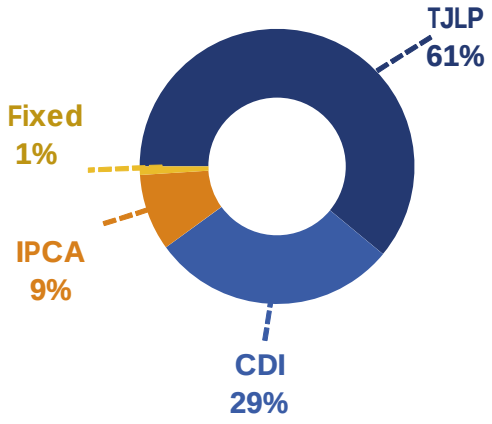

Tractebel Energia GDF SUEZ

Debt profile and strong cash generation reduce refinancing risk.

Maturity debt schedule (R$ million)

Composition of debt

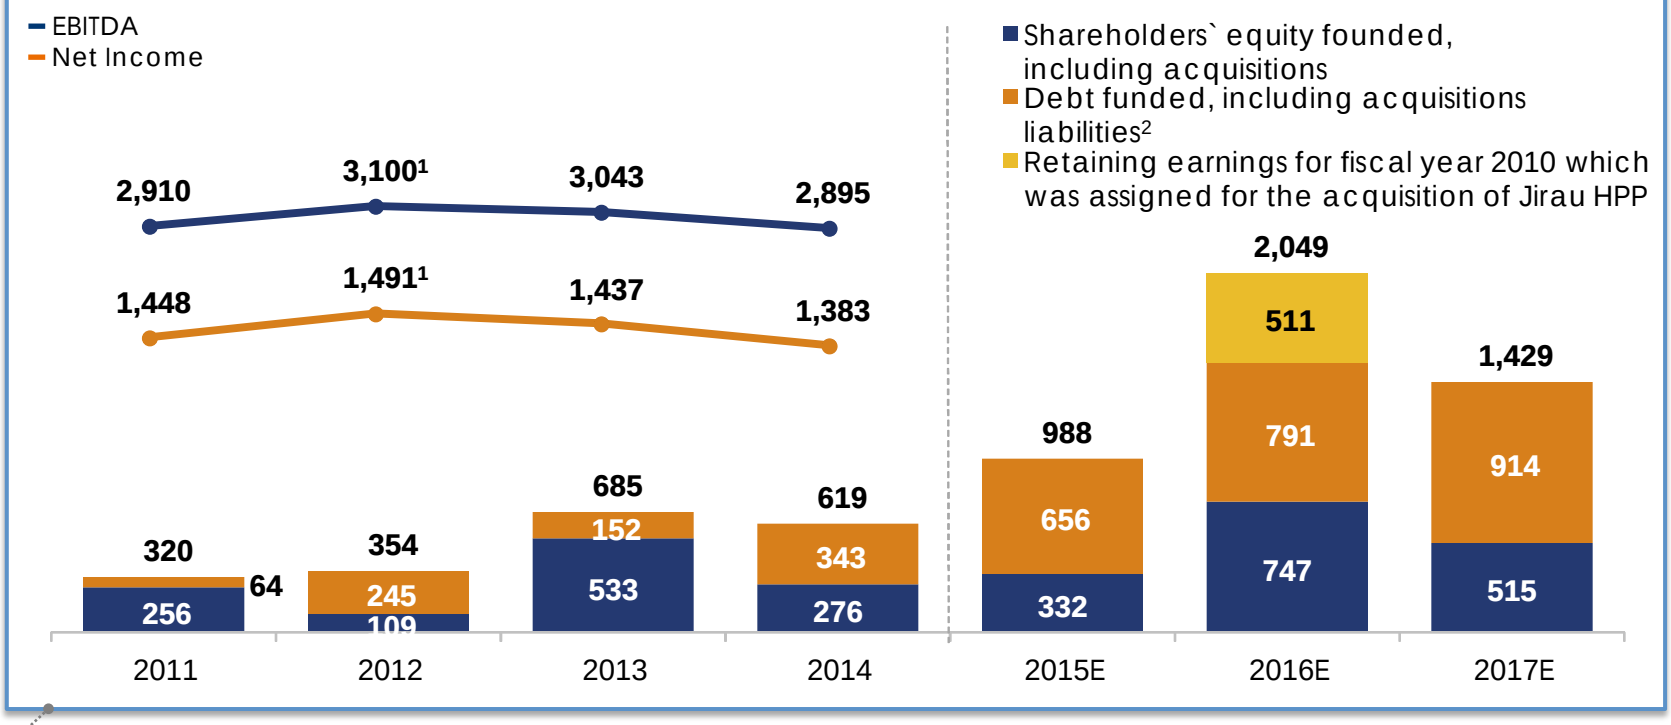

Nominal cost of debt: 10.3%

Expansion plan and maintenance CAPEX are supported by a strong cash flow generation

Tractebel Energia GDF SUEZ

Accomplished/expected CAPEX and corresponding financing sources (R$ million)

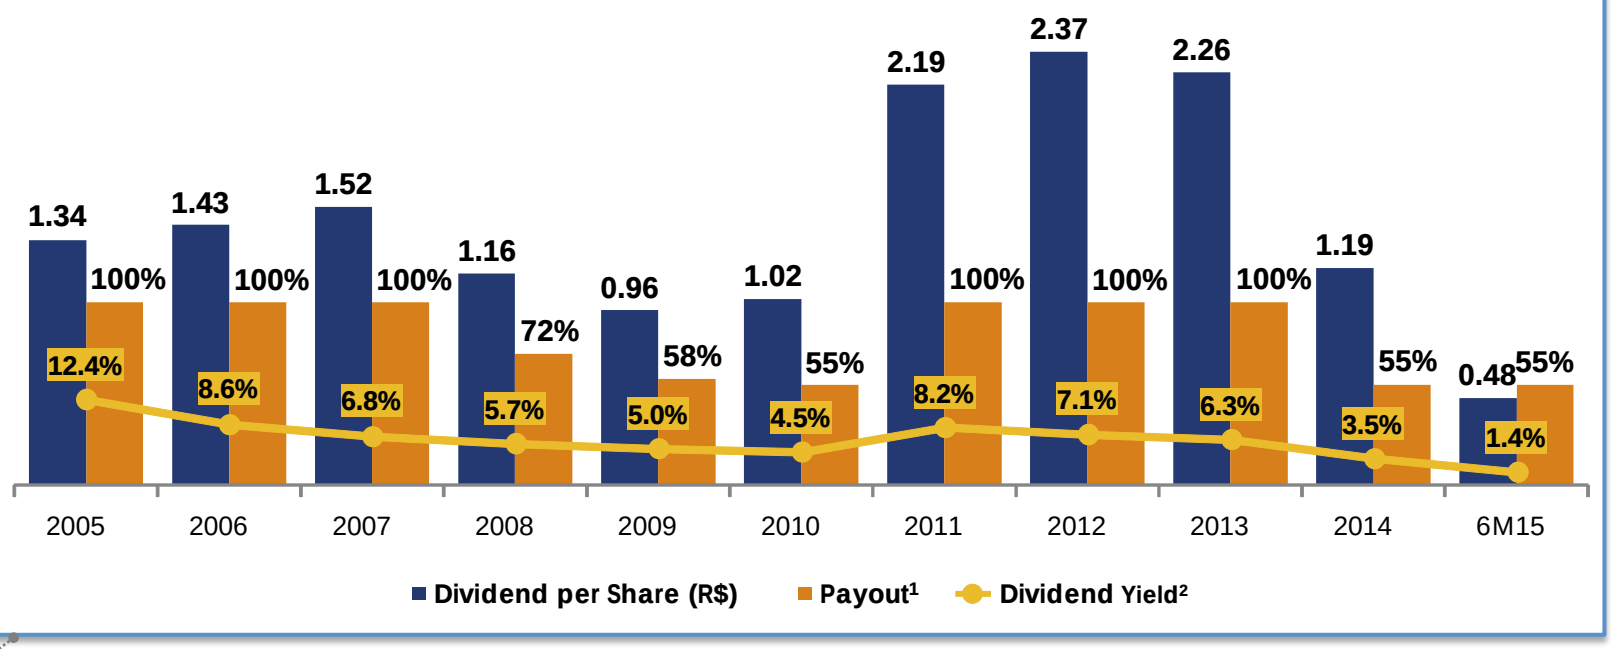

Notes:
1 Adjustment due to change in accounting practice.
2 Does not consider interests incurred during the construction.

Dividend policy

- By-law minimum payout: 30% of payable net income.
- Management commitment: minimum payout of 55% of payable net income.
- 3 dividends per year: semi-annual dividends and interest on shareholders' equity (annual).

Dividends (based on distributable net income)

Notes:
1 Considers the annual payable net income.
2 Based on volume-weighted closing price of ON shares in the period.

Competitive advantages

STRATEGIC INDUSTRY

✓ Defensive profile in times of crisis

✓ Attractive funding conditions

PREMIUM RATING

✓ "brAAA" by S&P and "AAA(bra)" by Fitch – Debentures and Corporate rated in long-term national scale

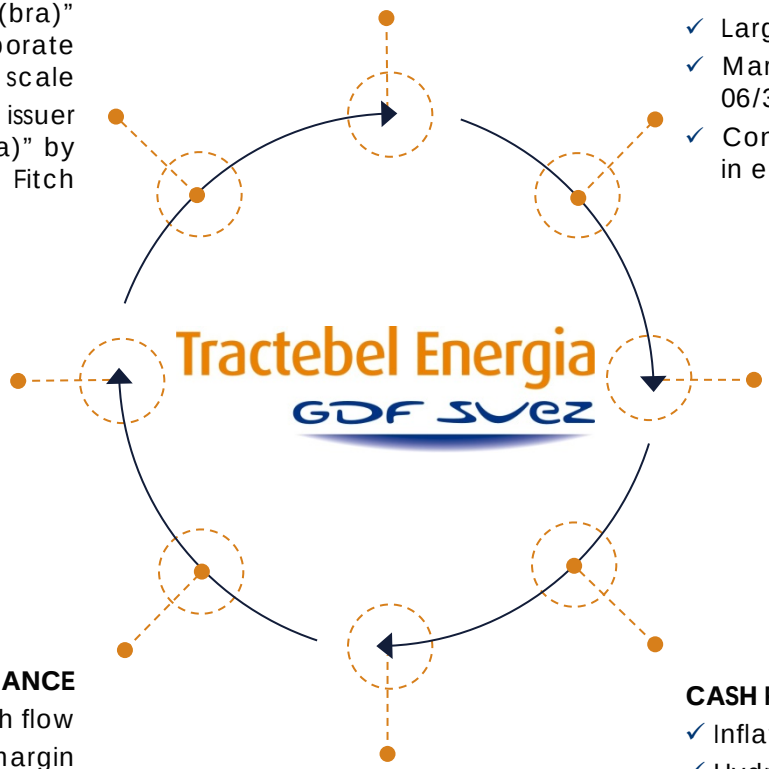

✓ In local and foreign currency issuer default ratings (IDRs) "BBB(bra)" by Fitch

INDUSTRY LEADERSHIP

✓ Largest private generator in Brazil

✓ Market cap: R$ 22.3 billion as at 06/30/2015

✓ Controlled by ENGIE, world leader in energy

HIGH-CALIBER CORPORATE GOVERNANCE AND SUSTAINABILITY

✓ Experienced executives

✓ Discipline track record in investment decisions, based on triple bottom line concepts

✓ First class controlling shareholder

CLEAR COMMERCIAL STRATEGY

✓ Heavily contracted in the next years

✓ Diversified portfolio between free customers (over different industries) and regulated ones (distribution companies)

✓ Benefits from windows of opportunities

STABLE FINANCIAL PERFORMANCE

✓ Strong cash flow

✓ High average EBITDA margin

✓ Consistent net income

✓ No FX exposure

✓ Active financial management

CASH FLOW PREDICABILITY

✓ Inflation-indexed contracts

✓ Hydro basis, complemented by thermal and wind

✓ Long-term contracting strategy

HIGH OPERATIONAL PERFORMANCE

✓ Benchmark indexes of availability

✓ ISO 9001 (quality management), 14001 (environment management) and OHSAS 18001 (occupational health and safety) certified plants

Notes:
[1] Additional indices available from ITR (Tractebel website / Investor / financial information).
[2] Does not consider Alegrete Thermoelectric Plant, which is under devolution process to the Union since 2013.
[3] Ceste not included.
[4] TF = number of occupational accidents for every million hours of exposure to hazards.
[5] TG = number of days lost due to occupational accidents for every one thousand hours of exposure to hazards.

Thermal side: exposure to spot prices

Notes:
[1] Tractebel Energia has been fully contracted → purchase of thermal substitution energy.
[2] On a monthly basis, inflexibility variations may occur.
[3] Figures related to the Energy Trading Board (CCEE) settlement point.

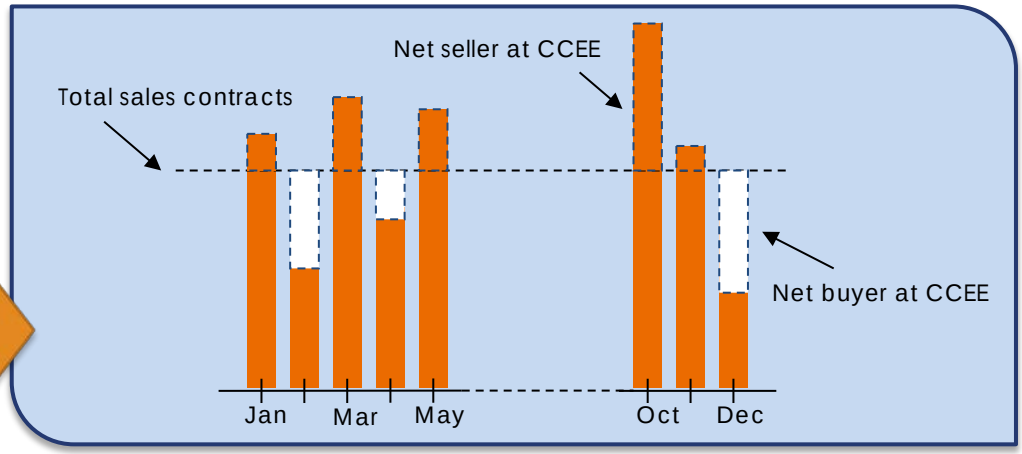

Power seasonalization

Tractebel Energia GDF SUEZ

How does the allocation of resources at CCEE (the energy trading board) over the months interfere with a genco quarterly results?

Annual resources

monthly allocation over year x1 (decision taken in Dec year x0)

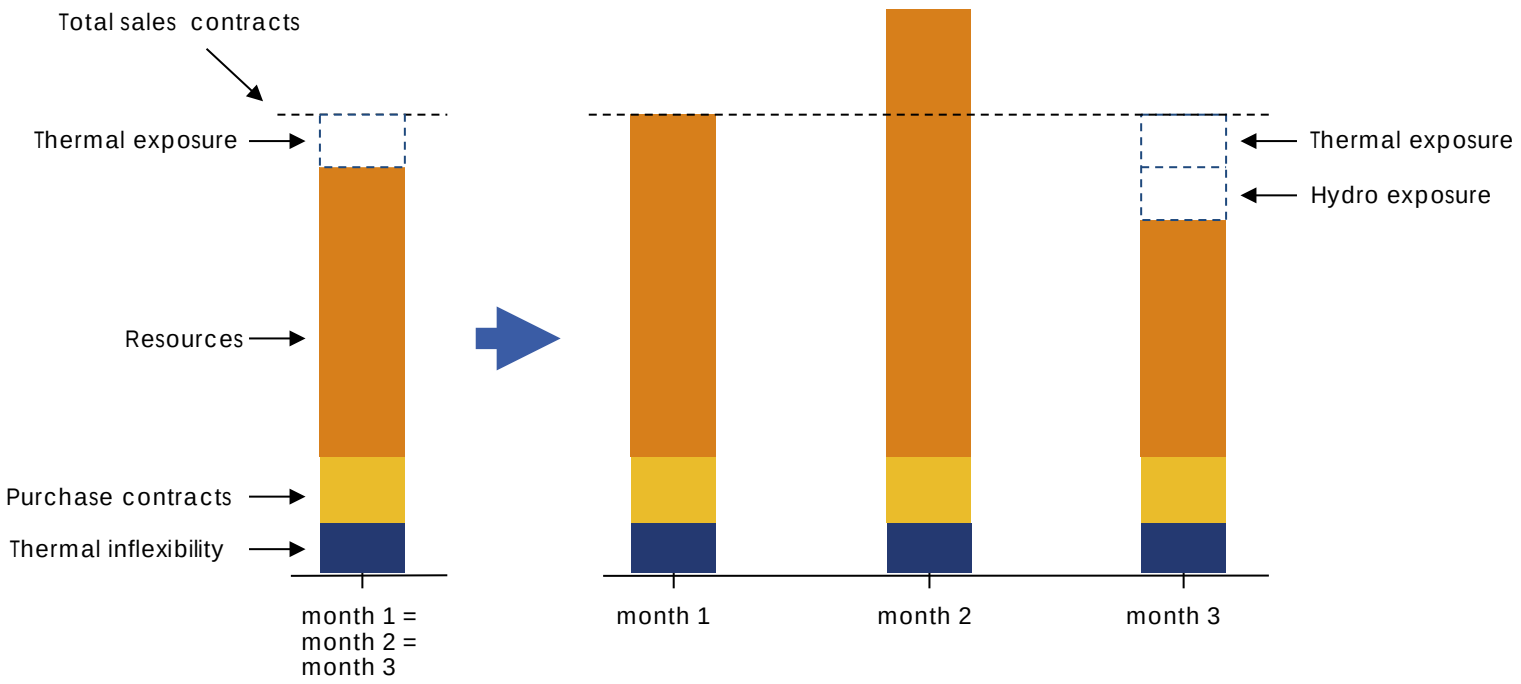

- Gencos can allocate their resources over the following year's months;
- Monthly fluctuations on sales is also a driver for exposure to spot price;
- Monthly energy differences are settled at spot price, i.e., PLD (Price for Settlement of Differences);
- As penalties apply for gencos with short positions considering the past twelve months, a "monthly closing" market is available for those gencos;
- The pricing for the "monthly closing" market is strongly linked to the spot price..

Mechanisms to mitigate exposure from the thermal side

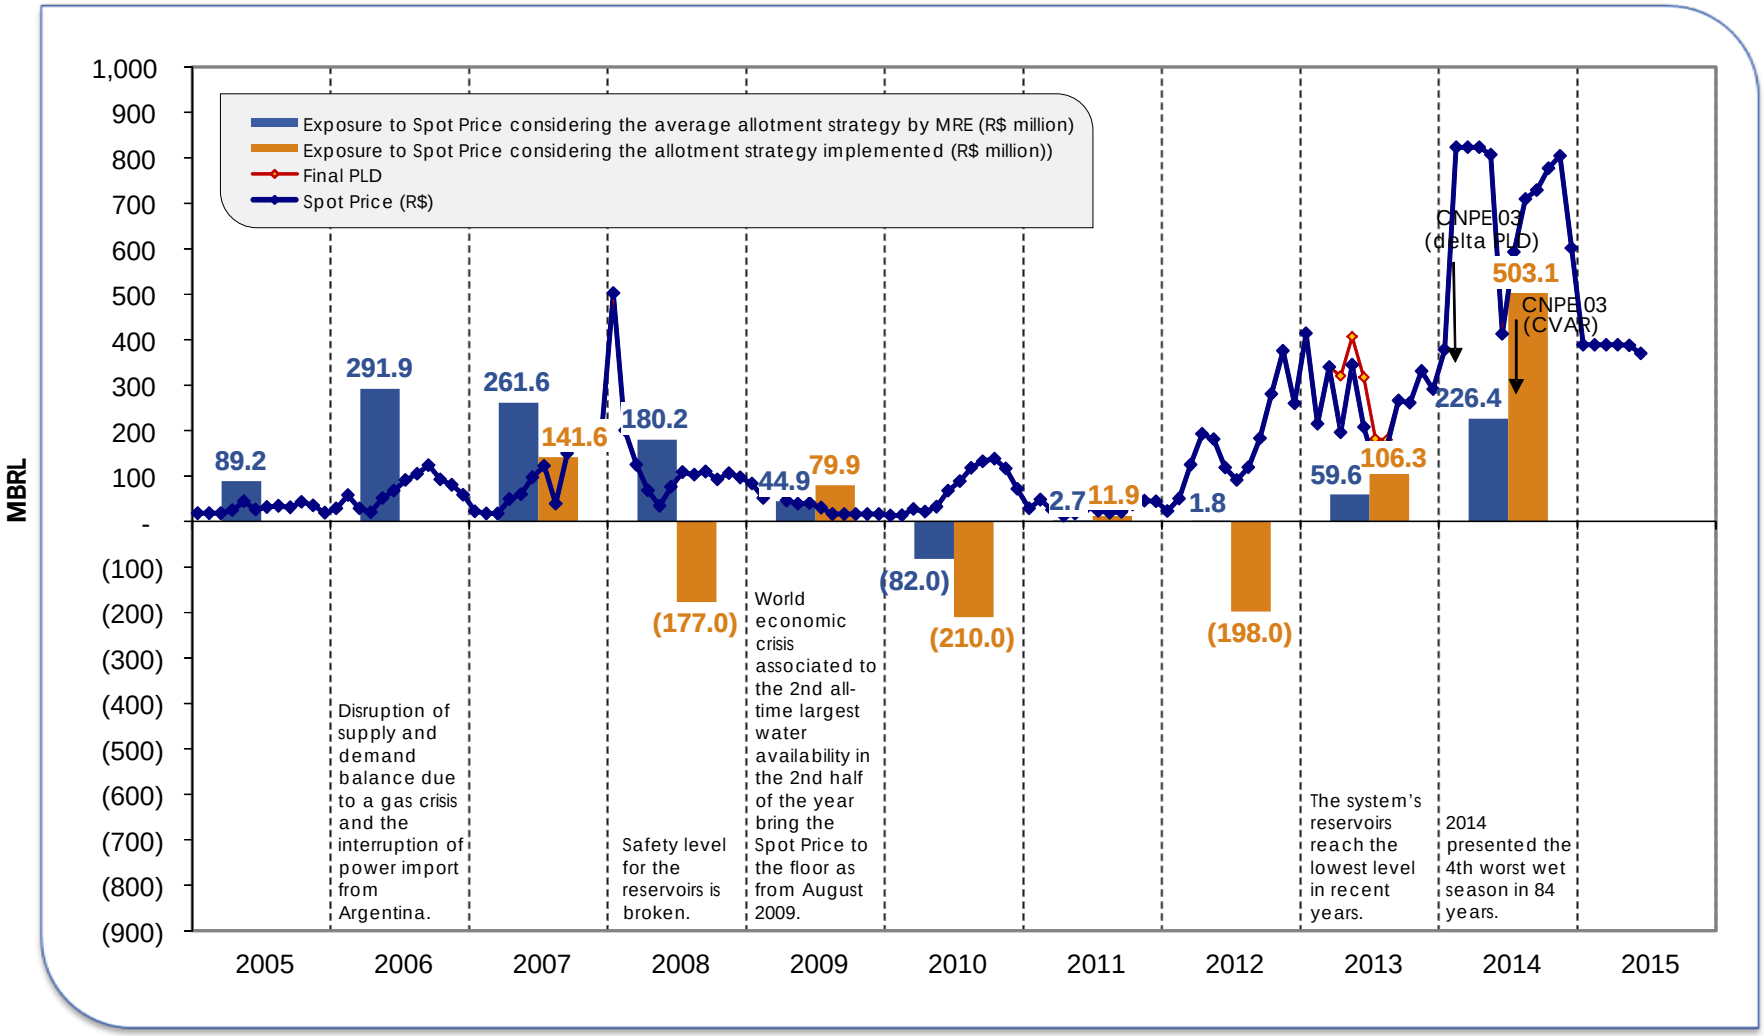

Tractebel Energia
GDF SUEZ

As a consequence of the two previous slides, an appropriate monthly allocation of the resources over the year can mitigate the exposure arising from the thermal substitution energy to be purchased at spot price. An example follows:

Note: exposure box sizes are out of scale.

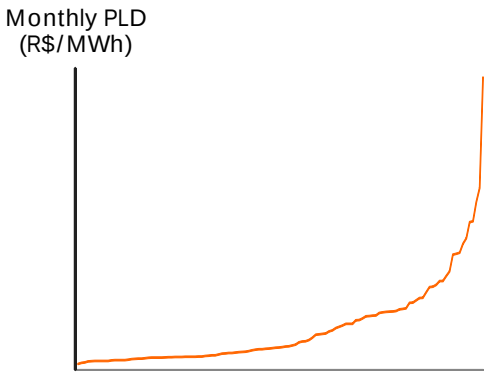

Expenses: impacts from energy allotment (2007 thru 2014)

Main drivers and distribution curve of spot prices

- Reservoir levels of hydro plants;
- Rainfall behavior;
- Forecast of demand for power;
- Current and future availability of power plants and transmission lines;
- Availability of natural gas.

Permanence Curve[1]

Ocurrence[2]

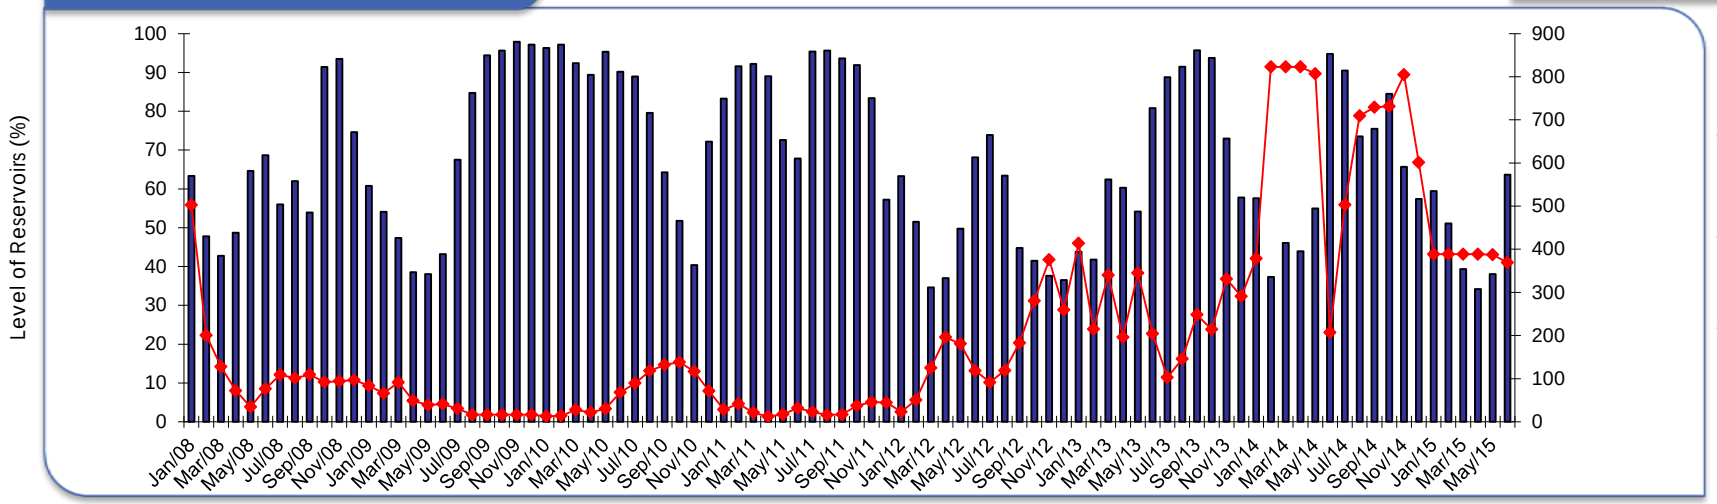

Period	May/2003 - Sep/2012	Oct/2012 - Jun/2015
Avg. PLD (in R$)	94.15	489.28
PLD Std Deviation (in R$)	98.13	236.99
Monthly PLD > R$ 100.00	33%	100%
Monthly PLD > R$ 200.00	9%	94%

Notes:
[1] Figures have been ordered from the lowest. Values adjusted by IPCA (inflation index).
[2] PM 579 was published on September 11, 2012. Values adjusted by IPCA (inflation index).
