ANNOUNCEMENT TO THE MARKET

ENGIE BRASIL ENERGIA'S SHARES TO CONTINUE IN B3 INDICES: SUSTAINABILITY (ISE) AND CARBON EFFICIENT (ICO2)

The Company was listed in 7th position overall and 1st in the electric sector

Florianópolis, December 16, 2021 – ENGIE BRASIL ENERGIA S.A. ("ENGIE" or "Company") (B3: EGIE3, ADR: EGIEY) announces to the shareholders and to the market at large that it continues to be a component of the Corporate Sustainability Index (ISE) of B3 – Brasil, Bolsa, Balcão S.A. ENGIE has been represented in the ISE portfolio since inception, one of only another five companies that have been similarly recognized.

With a weighting of 2.965% in the portfolio, the Company was listed in 7th place overall out of the 45 companies comprising the index, coming 1st in the electric sector according to the second preview which B3 published today. This is the 17th consecutive year that ENGIE Brasil Energia has been included in the list, that is since the inception of the index, a situation which has been repeated by only another five companies.

"We are particularly proud of this accolade, principally in the light of such a challenging scenario as the past two years. Sustainability remains at the core of our growth strategy, focus of which is on investments in renewable energy and transmission infrastructure. We continue committed to guaranteeing the execution of socio-environmental programs which benefit the regions where we have our operations, maintaining our profound respect for people and the planet as guidelines for our activities", explains the Company's Chief Executive and Investor Relations Officer, Eduardo Sattamini.

In line with new methodology, for the first time, the index considered as classification criteria the reputational risk and the score obtained by the companies in the Carbon Disclosure Project (CDP) for evaluating climate change initiatives.

Yet another important change was the sectorization of the questionnaire. Now B3's ISE show rankings with general scores as well as scores by sector with the aim of facilitating investors and managers in the mapping of companies with B3 listed shares which are most advanced in their ESG agenda.

BR's Carbon Efficient Index (ICO2)

ENGIE Brasil Energia has again been selected as a component of the new Carbon Efficient Index (ICO2) portfolio of B3 - Brasil, Bolsa e Balcão, for the second year running. ICO2 is made up of shares of the companies comprising the IBrX 100 and where there is a greater transparency in relation to the greenhouse gas emissions report and how each is preparing for a low carbon economy.

With its inception in 2010, ICO2 B3 seeks to act as a catalyst for discussions on climate change in Brazil. "ENGIE is committed to leading the transition to a low carbon economy and its participation in the ICO2 portfolio recognizes our activity and transparency with this theme, Sattamini adds.

Florianópolis, December 16, 2021.
