1Q17 Fact Sheet

Corporate Overview

ENGIE Brasil Energia (EBE) develops and operates power plants, being also an active player in the energy trading activity.

EBE is part of the largest independent power producer group in Brazil with an own installed capacity of 7,070 MW, which comprises about 6.3% of the total capacity in the country. The generating complex totals 31 plants, all operated by the Company, of which nine are hydroelectric power plants, four thermoelectric and 18 fired from complementary sources: three biomass-fired plants, eleven wind power plants, three small hydroelectric plants and one solar plant.

A total of 85% of all the Company's installed capacity in Brazil comes from clean, renewable sources with low greenhouse gas emissions, a position which has been further enhanced by the construction of new wind farms in the Northeast region of the country.
