MATERIAL FACT

CAPACITY RESERVE AUCTION

ENGIE BRASIL ENERGIA S.A., a publicly held company with headquarters in the city of Florianópolis, state of Santa Catarina ("ENGIE"), pursuant to the provision in CVM Resolution 44/2021, wishes to inform that its wholly-owned subsidiary, Companhia Energética Jaguara ("Company"), bid successfully in the Power Capacity Reserve Auction 2/2026 - Aneel ("Reserve Auction"), conducted through the Electric Energy Trade Board, for the 2030 Hydroelectric Power product, with the Jaguara Hydropower Plant (Jaguara HPP).

The Company committed to the sale of 195.78 MW for a term of 15 years for delivery as from August 1, 2030, guaranteeing a fixed annual revenue of R$ 270.4 million (baseline September 2025), restated annually in August according to the variation of the IPCA. Pursuant to the rules of the auction, the plant is unable to sell additional commercial capacity given its status as a quota-based power plant.

The Jaguara HPP, located on the Rio Grande River on the state divide between Minas Gerais and São Paulo, with a current installed capacity of 424 MW (average commercial capacity of 324 MW) and a concession maturing June 2048, was incorporated in the Company's generation portfolio in 2017 and currently, 70% of its commercial capacity is under the quota system and 30% is allocated to the Free Contracting Environment (ACL).

The addition of installed capacity will be 232 MW and will be achieved by motorizing two existing wells (two 116 MW turbines), with total estimated investment of approximately R$ 1,2 billion.

The Company reiterates its commitment to maintain shareholders and the market at large informed of developments in this matter of relevance to the market.

Florianópolis, March 18, 2026.
