MATERIAL FACT NOTICE

ENGIE BRASIL ENERGIA EXECUTES SALE AGREEMENT FOR THE JORGE LACERDA THERMAL POWER COMPLEX

ENGIE BRASIL ENERGIA S.A. ("Company"), a corporation, listed as a publicly traded corporation before the Brazilian Securities Exchange Commission ("Comissão de Valores Mobiliários" – CVM), pursuant to the contents of Article 157, paragraph 4, of Law 6.404, of December 15, 1976, as amended ("Corporations Law") and CVM Instruction No. 358, of January 3, 2002, as amended, hereby informs the market at large of the following:

On the present date, a Shares Sale Contract ("Contract") was executed by and between the Company and Engie Brasil Energia Comercializadora Ltda. ("EBC"), a Company subsidiary, as sellers; Fram Capital Energy II Fundo de Investimento em Participações Multiestratégia ("FRAM") and Diamante Geração de Energia Ltda ("Diamante"), as consenting parties; and Diamante Holding Participações Ltda. ("Diamante Holding"), a FRAM subsidiary, as buyer. The Contract governs the acquisition by Diamante Holding of the Company's and EBC's entire equity stake in Diamante, which holds the entirety of the assets that form the Jorge Lacerda Thermal Power Complex ("CTJL" or "Asset").

The selling price for a 100% equity stake in Diamante will be up to R$ 325,000,000.00 (three hundred and twenty-five million reais), of which R$ 210,000,000.00 (two hundred and ten million reais) will be paid at the closing of the transaction and up to R$ 115,000,000.00 (one hundred and fifteen million reais) are subject to restatement with certain conditions precedent provided in the Quota Purchase and Sale Agreement (QPA).

The Company's entry into the Contract was approved at the Meeting of the Company's Board of Directors held on the present date.

CTJL comprises a set of coal-fired thermal power plants with 857 MW installed capacity, located in Capivari de Baixo, in the South of the State of Santa Catarina. The sale of CTJL is an important step in the Company's gradual decarbonization process and aligns with the ENGIE Group's global purpose of acting to accelerate the transition to carbon-neutral world, directing its activities towards renewable energy generation, infrastructure and gas.

“The sale of the Jorge Lacerda Thermoelectric Complex is conducive to ensuring the gradual transition of the regional economy, reducing potential local socio-economic impacts when compared to a process of operational decommissioning,” said the Company’s CEO and Investor Relations Officer, Eduardo Sattamini.

The Company will keep its shareholders and the market at large duly informed, in a timely manner, on developments associated with this or any other matter of relevance to the market.

Florianópolis, August 30, 2021.
