MATERIAL FACT

ENGIE BRASIL ENERGIA SIGNS AGREEMENT FOR SALE OF THE PAMPA SUL THERMOELECTRIC POWER PLANT

ENGIE BRASIL ENERGIA S.A. ("Company" or "ENGIE"), a publicly listed company registered with the Brazilian Securities and Exchange Commission ("CVM"), pursuant to the provision in Article 157, Paragraph 4 of Law 6.404 of December 15, 1976, as amended ("Brazilian Corporations Law") and in CVM Resolution 44 of August 23, 2021, wishes to inform the market in general as follows:

As of this date, the Share Purchase and Sale Agreement ("SPA") was signed between the Company and Engie Brasil Energia Comercializadora Ltda. ("EBC", and together with the Company, the "Sellers"), a subsidiary of the Company, in the position as sellers; Grafito Fundo de Investimento em Participações Multiestratégia ("Grafito") and Perfin Space X Fundo de Investimento em Participações em Infraestrutura ("Space X", and together with Grafito, the "Purchaser"), in the position as purchasers. The SPA regulates the acquisition by the Purchaser of the total corporate stake that the Sellers hold in Usina Termelétrica Pampa Sul S.A. ("Pampa Sul"), which in turn holds the total assets and rights of the Pampa Sul Thermoelectric Power Plant ("Pampa Sul TPP" or "Plant").

Situated in Candiota in the state of Rio Grande do Sul, Pampa Sul TPP has mineral coal as its energy source. With 345.0 MW of installed capacity and 323.5 aMW of commercial capacity, the Plant sold 294.5 aMW at the 20th New Energy Auction (A-5/2014) through the intermediary of a 25-year contract, having begun commercial operations on June 28, 2019.

For the Company, the total economic benefit will be approximately R$ 2.2 billion divided between the sale price of up to R$ 450,000,000.00 (four hundred and fifty million Reais), and the assumption of Pampa Sul's debt by the Purchasers in the amount of approximately R$ 1,800,000,000.00 (one billion, eight hundred million Reais). The Purchasers will also obtain the full release of the corporate guarantee provided by ENGIE within the scope of the aforementioned indebtedness.

At a meeting today, the Board of Directors approved the Company's signature of the SPA.

"This disposal is very positive for ENGIE's plans of directing its efforts and investments towards renewable energy projects and transmission infrastructure. Following the conclusion of the operation, we shall have taken a further step forward in our strategy, ENGIE consolidating its position as the largest clean energy company in the Brazilian electricity sector, totaling 8,096 MW of proprietary installed capacity derived from renewable sources", declared Eduardo Sattamini, Chief Executive and Investor Relations Officer at ENGIE Brasil Energia.

The Company will maintain its shareholders, employees and the market informed on the key developments involving these negotiations.

Florianópolis, September 15, 2022.

Eduardo Antonio Gori Sattamini
Chief Executive and Investor Relations Officer
